

# My Star Alchemy

Bringing you the Magic and Wisdom of the Stars

## Behenian Stars Vega, Sirius Alkaid and Polaris

With Cayelin K Castell & Erik M Roth

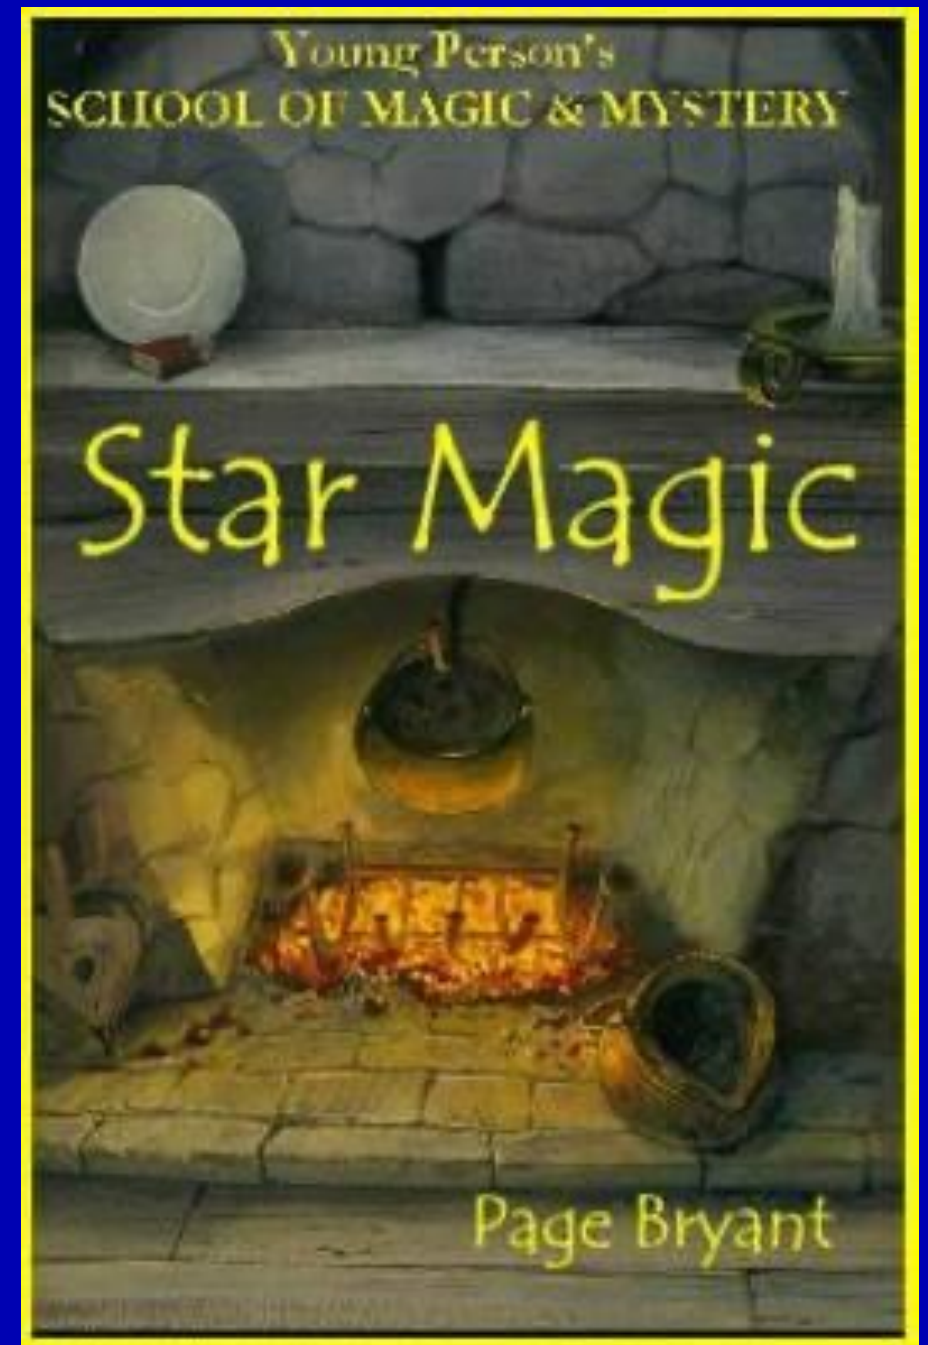

The night sky is filled with magic. Teachings about this magic has long been passed down since the dawn of human history.

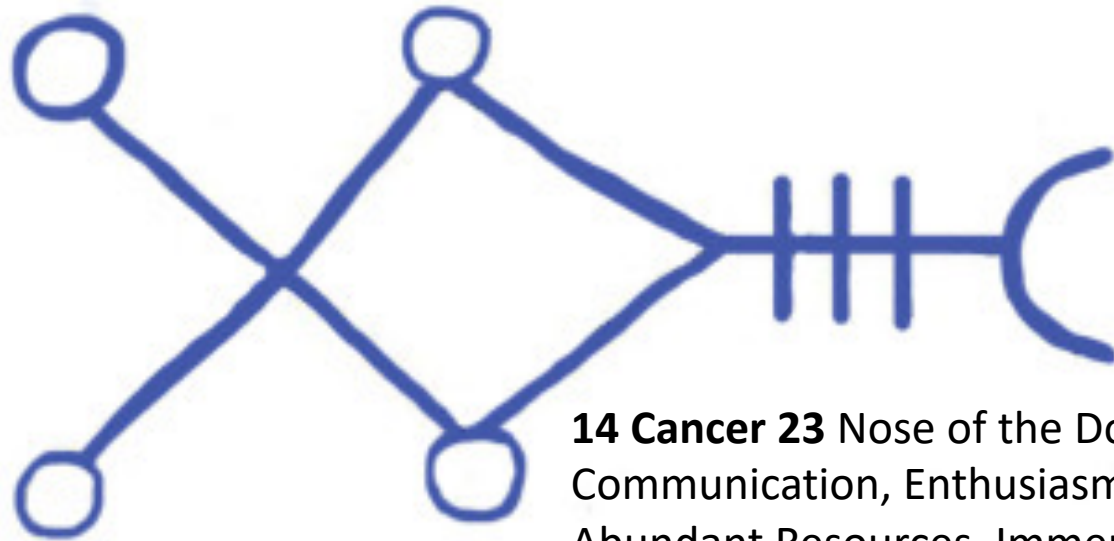

Long ago when there were no lights to hide the stars children and grown-ups alike marveled at the wonders above their heads.

They surely must have wondered how the stars got there, who made them, and how they came to be. Imagine storytellers sitting around warm bright campfires on cold starry nights whispering tales about the magic in the stars.

When gazing up at the heavens twinkling stars were not all our ancestral people saw. Sometimes they saw stars falling from the sky, and even stars with long tails!

Stories were the way those mysterious objects in the universe where explained. Star myths are fun, but they also serve a very important purpose. They teach us about the heavens and the magic hidden within it. ~ Page Bryant

# Sirius

**14 Cancer 23** Nose of the Dog in Canis Major  
Communication, Enthusiasm, Passion, Relational Peace, Faithful,  
Abundant Resources, Immense Creative Expression, Doorway Guardian

**Planets: Venus**

**Herb: Juniper**

**Stones: Beryl**

**Color: Blue White**

**Incense: Frankincense, Myrrh**

**Copal, Dragon's Blood**

Oh Glorious Brightest Star in our Night Sky, Bringer of Renewal  
Through Creative Inspiration activating Radical Health, Wealth and Well-Being  
Thank you for Blessing and Energizing My (Talisman, Amulet, Elixir, Altar)  
Thank you for your Brilliant Love-Light,  
Thank you for Gifting Me with Your Healing Abundance  
Giving Birth to a New Year, a New Way, a New Cycle of Time  
Where I am Living in the High Vibrational Energies of  
Peace, Plenty, Harmony and Good Will For ALL

**©My Star Alchemy**

## Starlight Elixirs on Sirius in the Constellation of Canis Major A Blue/White Star 8.6 Light Years away

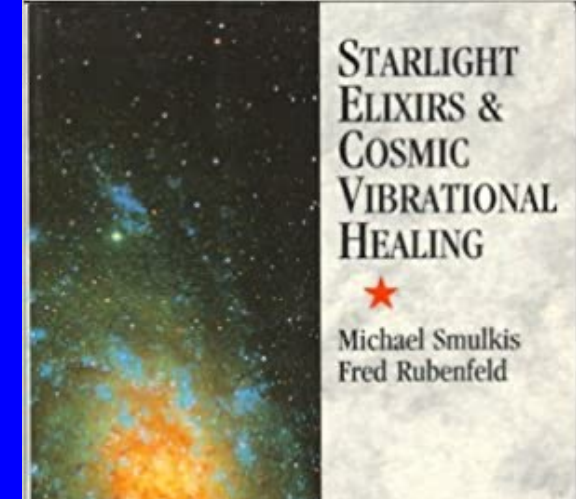

Sirius is reminding us that transformation of the physical body, including the DNA has never been more important and **Sirius is here to help shift our physical vibration** so healing can truly occur.

Connecting with Sirius sets up an internal vibration resonance between the physical, mental, emotional and spiritual bodies. This creates a temporary state of harmony while viewing the star or immediately after the Sirius star elixir touches the physical body. **Using visualization and intention increases the effect each time the star is viewed or meditated upon and/or the elixir is used.**

The healing effects are magnified when focusing on this star through meditation, amulet, herbal remedy, elixir, etc for at least seven days. They don't have to be successive days.

Sirius is of benefit whenever a healer is working with some level of sympathetic, empathetic, or symbiotic healing. Using the elixir or connecting with your Sirius amulet or talisman just before bed is also highly recommended.

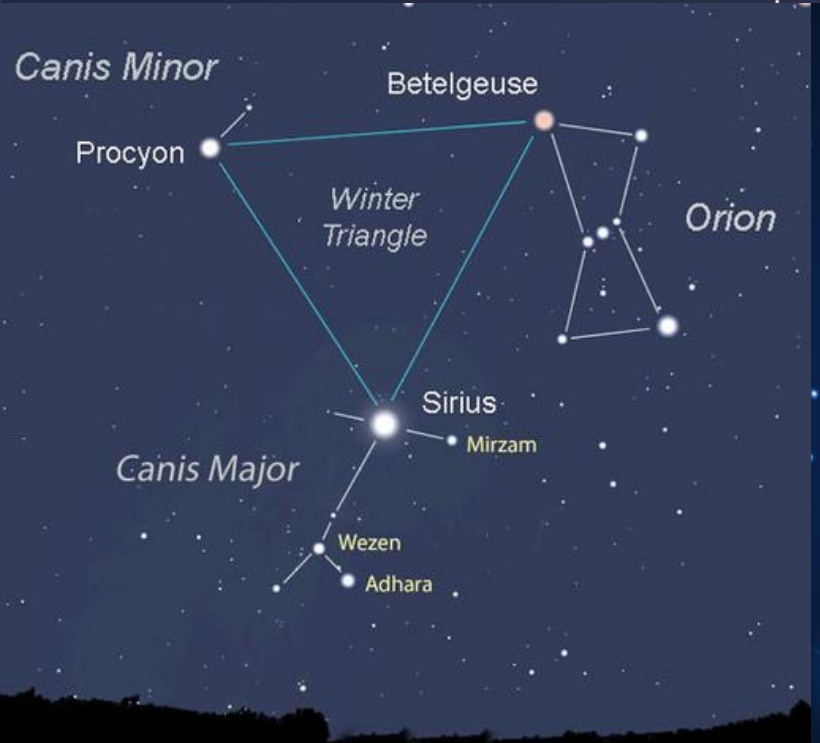

~ Starlight elixirs and Cosmic Vibrational Healing by Michael Smulkis us and Fred Rubinfeld published in 1992

# Astronomy of Sirius

## Blue White Star

- Located in Canis Major, is referred to as the Dog Star
- Brightest Star in our Night Sky -1.46 magnitude due to close proximity to Earth only 8.6 light years away from Earth for another 210,000 years or so
- Sirius is derived from a Greek name Seirios meaning Glowing or Scorching
- A binary Star: Sirius A (twice the size of our Sun) and Sirius B (a white dwarf star) orbit each other about every 50 years.
- Helical Rise of Sirius in Egypt marked the annual flooding of the Nile river
- Polynesians saw Sirius as a winter star and it was important in helping them navigate the Pacific Ocean

# Sirius is Overhead Around Mid-night every New Year

Sirius is with the Sun about 70 days from May 25 to August 3 Sirius depending on your latitude.

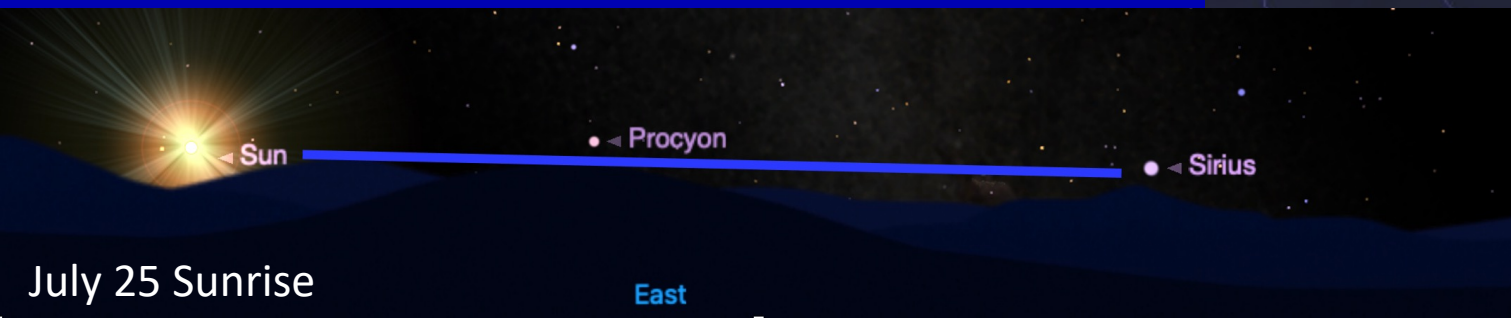

Sirius conjuncts the Sun Every Year around July 5 or 6. Sirius was with the Sun on July 4 in 1776.

Sirius Rises with the Sun July 25 on the Mayan Day Out of Time

Heliacal Rise of Sirius is in August. The exact date depends on your latitude.

SE

The Belt of Orion connects two Behenian Stars Sirius on one side and Aldebaran (also one of the 4 Royal Stars) on the other.

With the Behenian Star Cluster the Pleiades also near Aldebaran

# The Declaration of Independence Declares

- All People are Created Equally
- All People have Basic Rights that No one Should Be Able to Take Away
- These Rights are Our Divine Inheritance
- Including Life, Liberty and the Pursuit of Happiness
- True and Just Government is created by the People, for the People to Protect these Rights
- Government Gets Its Power from the People It Governs
- If a Government doesn't Protect these Rights then the People have the Right to Change the Government

Sirius with the Sun was exact on July 4 back in 1776 and is a BIG reason why the Declaration of Independence was purposely and ceremonially put into place on that date in 1776.

# Sirius

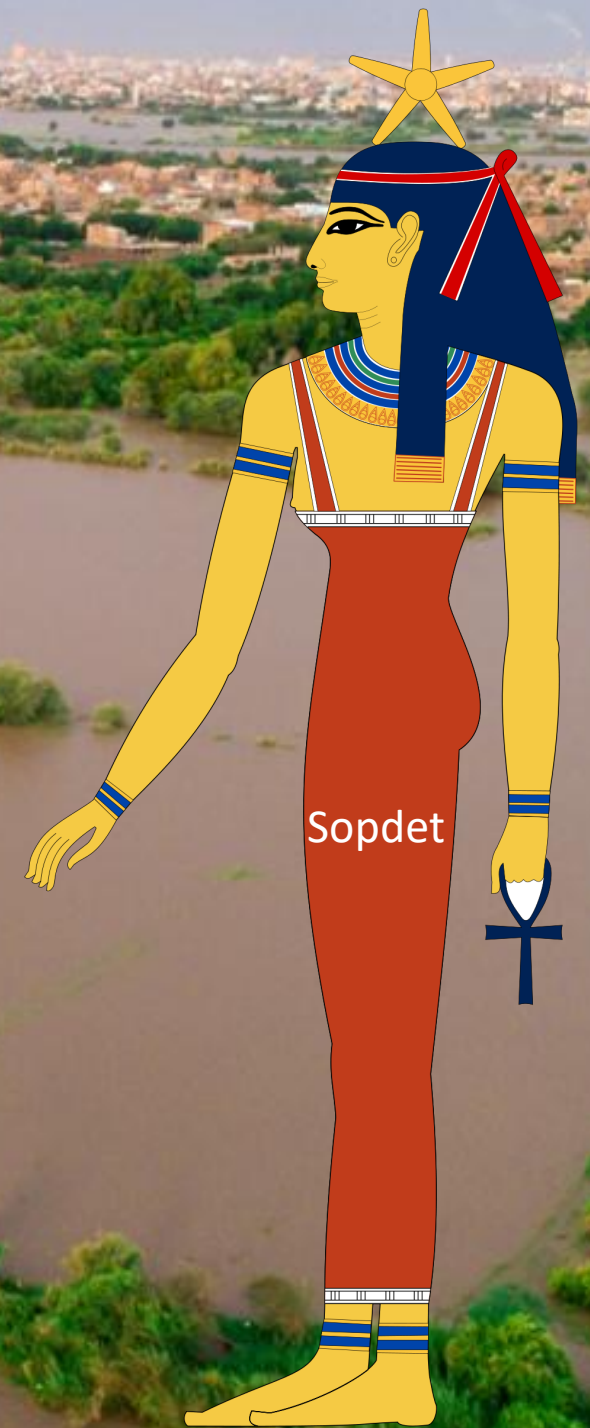

Sirius was on the ecliptic 100,000 years ago (Procyon was on the ecliptic 51,000 years ago) as modern humans were just beginning to spread across the planet.

*Sirius was known as Sopdet thousands of years ago in ancient Egypt, playing a powerful role in the life of the Egyptian culture.*

*Sirius played a central part in understanding the Nile River and its annual gift of flooding and renewal.*

*It represented the goddess Hathor or Isis (depending upon the area of Egypt).*

The Egyptians referred to the heliacal rising of Sirius (before the Sun) and its associated festival as *prt spdt*, “the going forth of Sopdet.” (Holberg page 9)

# *Sirius/Sothic Calendar*

## *Phoenix, Dog Star*

A 365 day calendar based on Sirius was known by the ancient Greeks as the “Sothic Cycle” (Sothis is the Greek name for Sirius). After 1,461 Sothic Cycles, the calendar would return back in line with the civic calendar (1,460 years).

*There is also a relationship between Sirius and the mythic bird, Phoenix. The story is that for centuries or millennia, Phoenix flies west to build a funeral pyre at the temple of Heliopolis in Egypt, then is consumed by the fires.*

*Phoenix is then re-birthed from the fire’s ashes, where it flies east to repeat the cycle. This points to a relationship between Sirius and the Sun and the 1,461 Sothic Cycles.*

Today, Sirius is known as the “dog-star” and its canine imagery goes back to ancient Europe.

**The Stone for Sirius is Beryl** and the principal source is beryllium defined by Webster's as a *mineral that has silicate of beryllium and aluminum of great hardness that occurs in colorless hexagonal prisms when pure.*

Beryl ranges in size from very small to as large as 18 meters (59 feet) and is the strongest of the precious stones.

Beryl comes from the Latin root *brillare* meaning "to shine" and is considered to be the Mother of All Healing Stones. Sirius also means brilliant, shining one helping us to connect to our own shining essence!

Stones in the Beryl family include:

**Aquamarine** (blue-green), **Bixbite** (red),  
**Emerald** (green), **Morganite** (pink),  
**Heliodor** (golden yellow), **Goshenite** (white).

Emerald

Heliodor

Bixbite

Aquamarine

Varieties of Beryl

Maxixe

Morganite

Goshenite

Trapiche Emerald

Beryl is said to enhance intelligence, love, and physical energy.

In ancient times Beryl was used to ward off evil spirits and to keep travelers safe.

It also enhances creativity so is a great talisman for artists or anyone doing any kind of creative work.

For example, Leonardo da Vinci wore a Beryl ring.

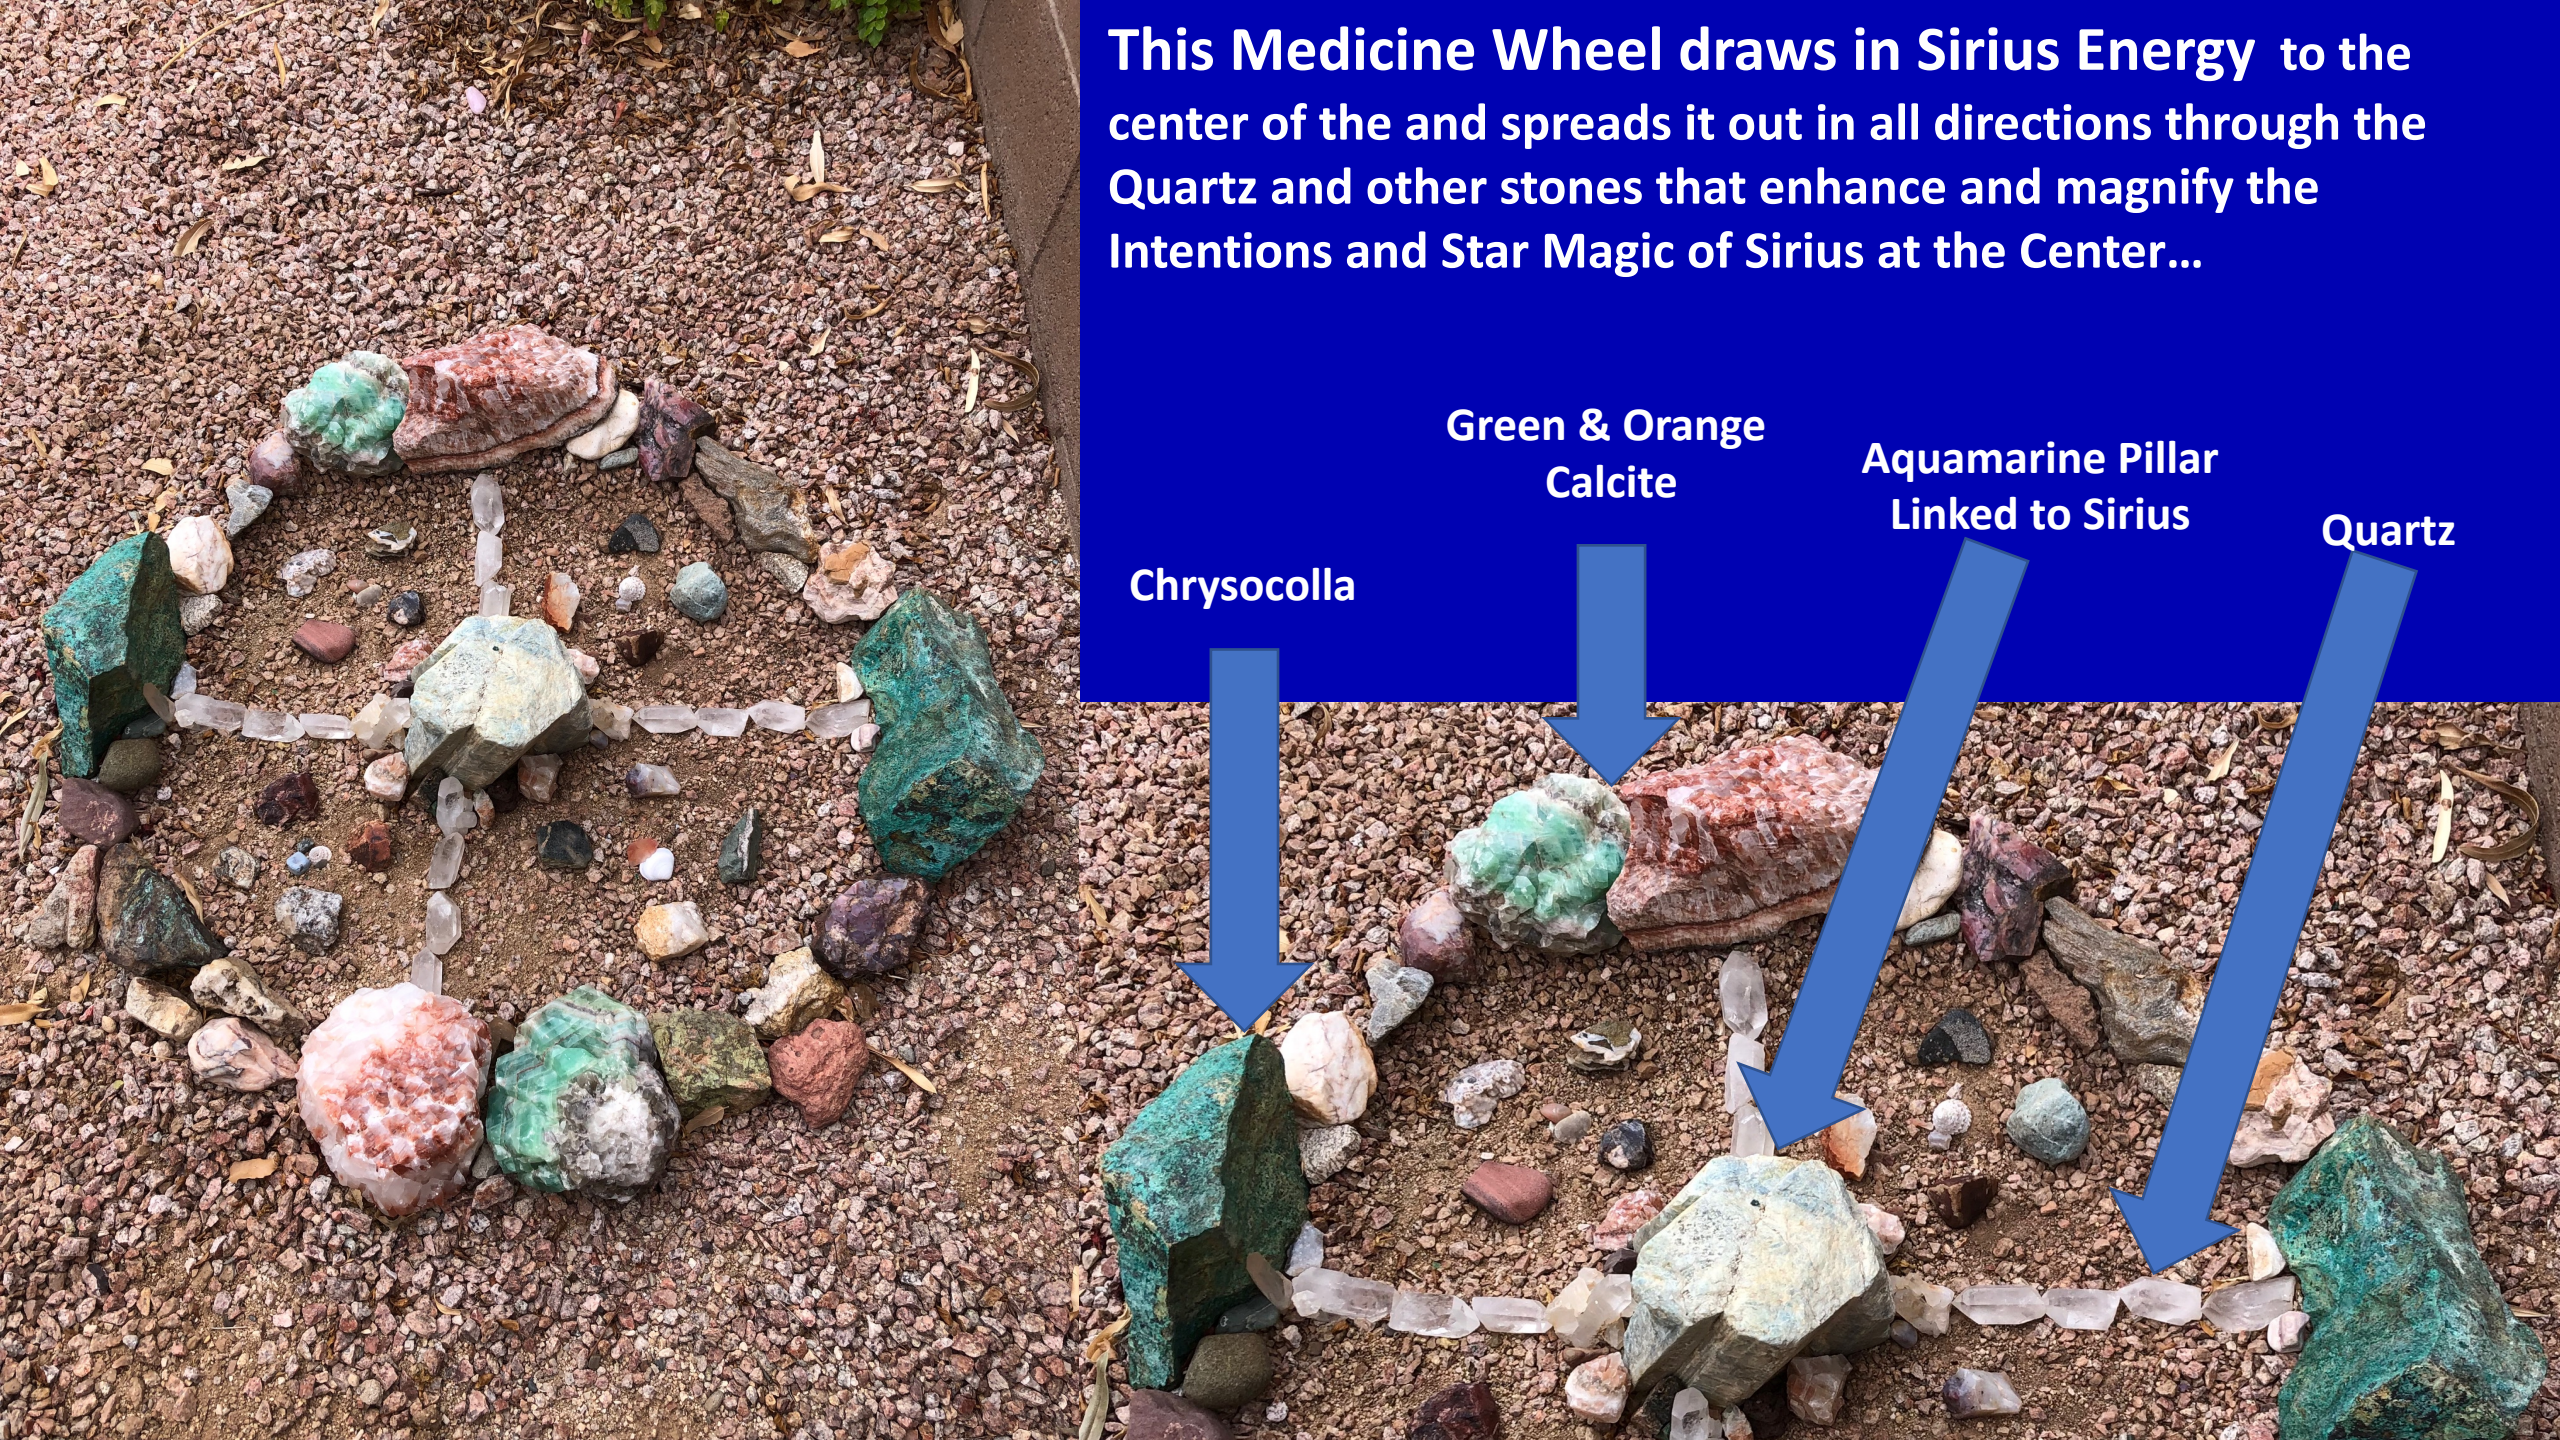

Health wise Beryl is used for healing the heart, stomach and intestines, spine, liver, lungs and eyesight.

Beryl stones can also help balance the chakra related to its color.

Formosan Juniper

Agrippa lists Savin Juniper (one of several types of Juniper) for the Star Sirius - most likely because it is native to the mountain areas of central and southern Europe where he is from.

Savin Juniper is also found in Siberia, Caucasus in Russia and Asia Minor.

Whatever type of Juniper is in your part of the world will surely work its Juniper Magic when energizing it with Sirius Magic

# The Herb for Sirius is Juniper

Juniper is a symbol of the Canaanite fertility goddess Ashera (Asherah) or the Syrian Goddess Astarte valued for thousands of years as a healing herb and culinary spice.

Juniper is also used as the main ingredient in making Gin.

The medicinal properties of Juniper aid digestion, and other stomach issues including intestinal gas (flatulence), heartburn, bloating, loss of appetite, as well as gastrointestinal (GI) infections and intestinal worms.

As an herbal medicine Juniper was used to stimulate contractions during labor helping women to give birth more easily.

Conversely, it was also used to help abort an unwanted pregnancy.

Ashera  
Asherah  
Astarte

A close-up photograph of a juniper branch. The branch is covered in small, green, needle-like leaves. Interspersed among the leaves are several clusters of small, round, blue berries. The background is a soft, out-of-focus green, suggesting more of the same plant.

## Benefits of Juniper

- Helps Purify the Blood
- Aids in improving blood circulation
- Aids in eliminating inflammation
- Aids in removing body toxins
- Helps eliminate fatigue and depression
- Strengthens the Immune System
- Enhances the Digestive System
- Supports healthy kidney and urinary function
- Acts as a natural cleansing agent
- Helps relieve tension and stress
- Assists with Childbirth
- Supports Healthy Cognitive Function

# JUNIPER

*Genus: Juniperus*

The essence of juniper has long been considered important as a purifying cleanser and as a protector against malignant and dangerous forces. Juniper berries were used in Europe along with rue to cleanse and fumigate the house prior to the celebrations of May Day. Nowadays, people who follow spiritual traditions rub juniper oils into their hands.

***The act of rubbing the oil from juniper berries into the hands can help to cleanse a person's aura.***

## Juniper was used for Ceremonial Protective Magic of All Kinds

Great for:

Purifying, cleansing and strengthening the aura or energy field.

Used ceremonially to increase positive energy and enhance love and health, attract money, guard against black magic, and protect against accidents and diseases.

Protects against negative energy from the environment and other people increasing psychic powers and visions.

When Planets are with Sirius using Beryl and Juniper, either together or separately helps strengthen your own creative possibilities by first clearing your energy and then strengthening the positive energy around what you are envisioning and intending.

Vega

Vega 15 Capricorn 34 (main star of the Lyre) Star of Music

The Babylonians saw Vega as Messenger of Light

Astronomy Designation: Alpha Lyrae

Artistic, Idealistic, Hopeful, Social Awareness, Magic, Alchemy

**Planets: Venus & Mercury**

**Herb: Winter Savory**

**Stones: Chrysolite or Peridot**

**Color: Pale Sapphire and  
Light Green**

**Incense: General Incense**

Oh Exalted and Wise Guardian Star of High Vibrational Healing Sound

Thank you for Blessing My (Talisman, Amulet, Elixir, Altar)

Enlivening your Gifts of Glorious Natural Be-ing

Do-ing Only When Necessary

Riding always upon the Alchemy of Love, As a Golden Purifier

Blessing Me with Your Magic and Protection

# Starlight Elixirs on Vega in the Constellation of Lyra

## A Blue/White Star 26 Light Years away

This star resonates with the common bond of interconnectivity and creating musical expression through vibration - also known as high vibrational resonance.

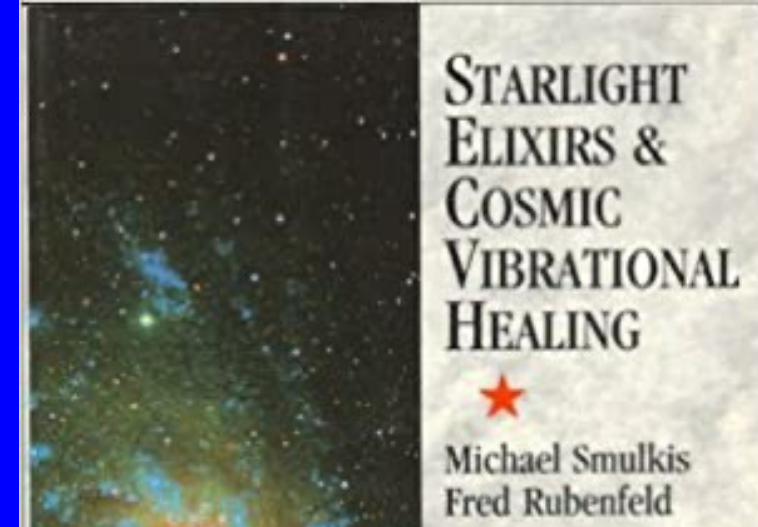

For those who are tone deaf or have trouble connecting with music attuning to Vega can assist in deepening appreciation of sound healing through music.

Vega can assist us in attuning to our personal soul note and soul family in the greater whole of humanity and assist in raising our vibration to higher dimensions.

In Atlantis (and in our current time) attunement to one's soul note as well as the universal language of life supported interdimensional, intergalactic and interstellar communication.

This occurs when meditating on or astral traveling to Vega and is enhanced by the Vega Starlight Elixir.

~ Starlight elixirs and Cosmic Vibrational Healing by Michael Smulkis us and Fred Rubinfeld published in 1992

Northeast, May Evenings

# Vega In the Constellation Lyra

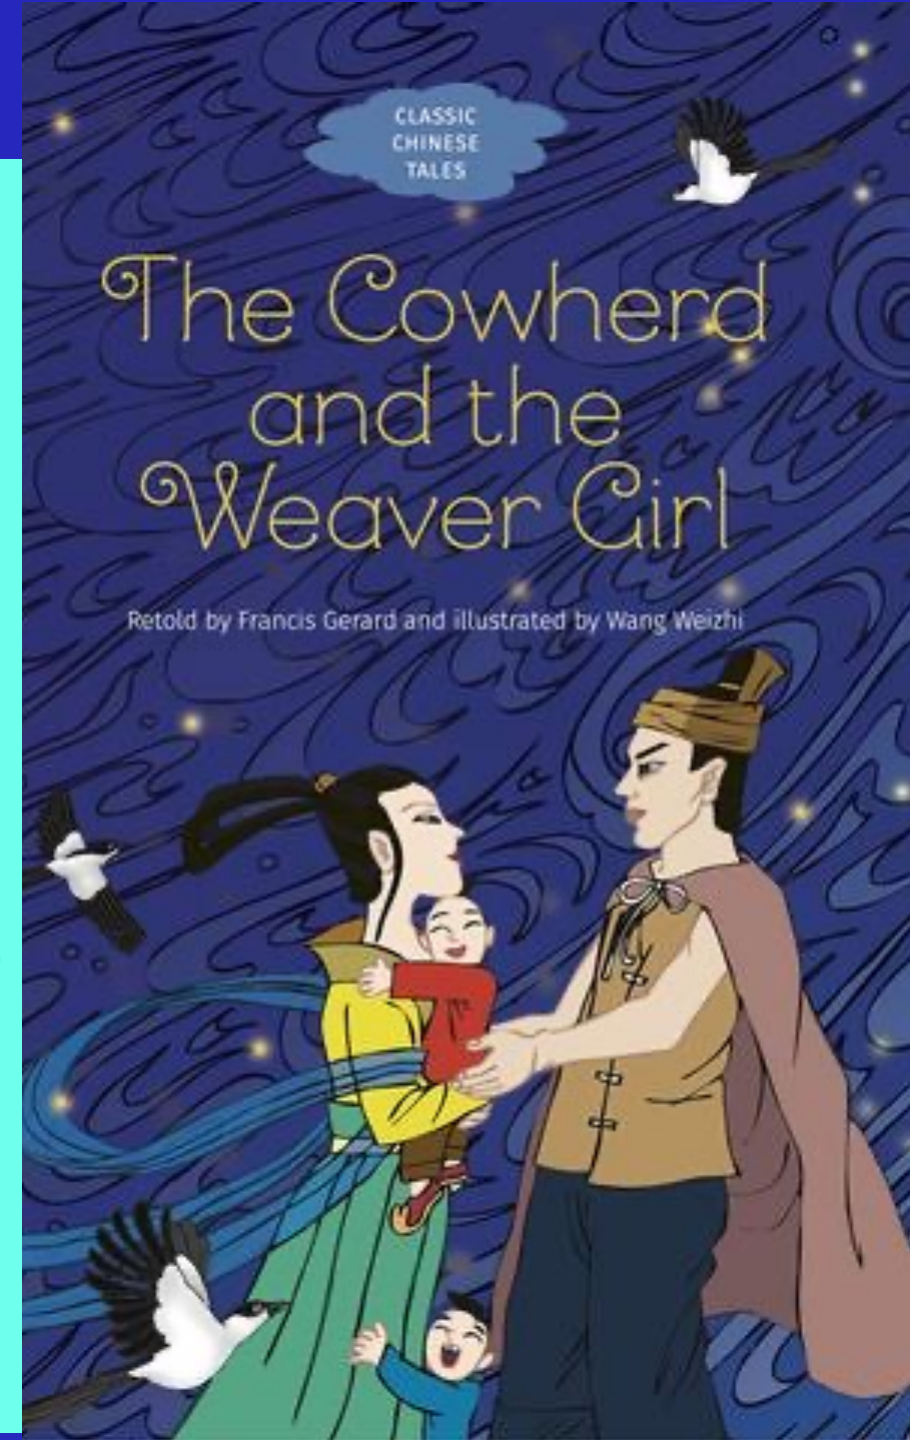

The traditional name Vega (earlier Wega) comes from a loose transliteration of the Arabic word wāqi' meaning "falling" or "landing", via the phrase an-nasr al-wāqi', "the falling eagle".

*Lyra constellation transmission also is linked with the tale of Orpheus and his string instrument coming from the body of a turtle (created by Hermes/Mercury). The connection to a string instrument comes from the Greco-Roman traditions.*

*Ancient Chinese and Japanese culture were inspired by the star Vega and they each have a story centered about the star Vega in relationship with Altair – aka the **Weaver Girl and the Cowherd** with references to the Sky King. In that time, the Japanese called Vega **Orihime** and celebrate a festival in July / August called Tanabata. The date the Tanabata festival is celebrated is "movable" due to its origin being on a lunisolar calendar (held on the 7<sup>th</sup> day of the 7<sup>th</sup> lunar month).*

The story of the **Weaver Girl and the Cowherd** have some resonances with the Mesopotamian saga story of Dumuzi and Inanna.

Artwork: The reunion of the couple of The Weaver Girl and the Cowherd on the bridge of magpies. Artwork in the Long Corridor of the Summer Palace in Beijing.

# Vega a.k.a The Vulture Star

Vega and its constellation is also known as a vulture or other bird diving (or falling) from ancient Egypt and Mesopotamia.

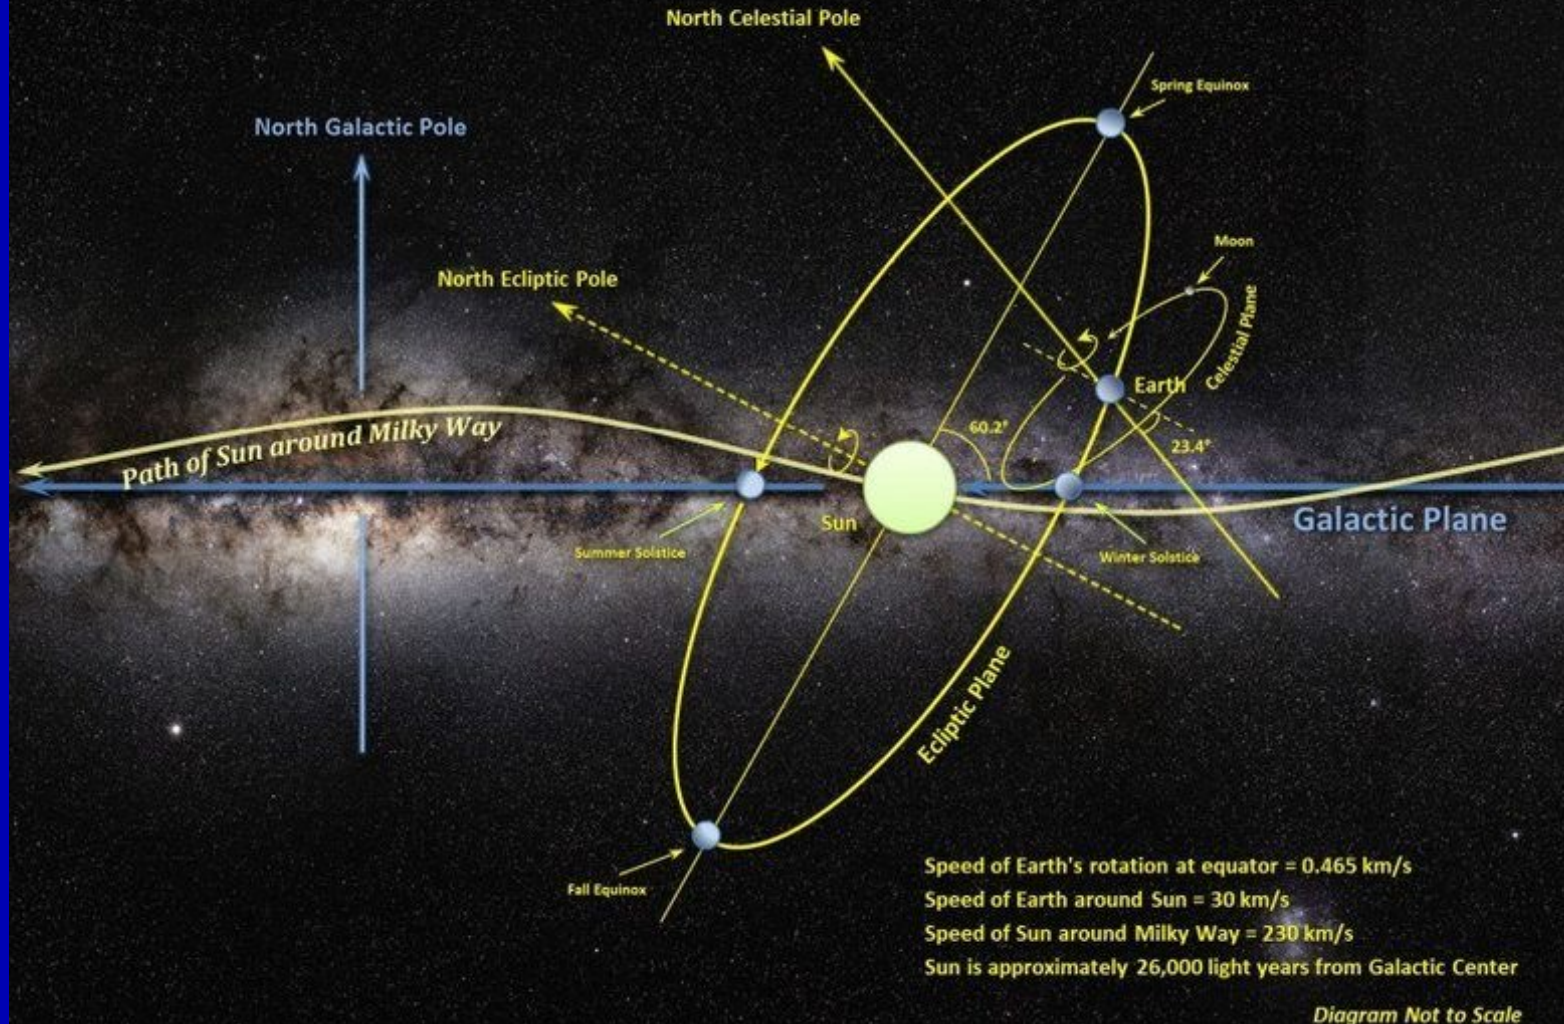

Agrippa refers to Vega as a “Falling Vulture”. Assuming his knowledge of the Behenian stars comes from Hermes, then the avian imagery of Vega and the constellation of Lyra goes back many thousands of years.

# Solar Apex and Antapex

## MOTION OF EARTH AND SUN AROUND THE MILKY WAY

**Solar Apex = Sun's Direction Toward (Vega)**  
**Solar Antepex = Sun's Direction From (Sirius)**

Currently, Vega is located in the circumpolar constellation of Lyra at  $15^{\circ}$  Capricorn  $36'$  in the region of the Solar Apex. Sirius is located at  $14^{\circ}$  Cancer  $21'$  near the Solar Antapex.

Why has Sirius been so influential for humanity? Could it be that Sirius is a symbolic aspect of our origin?

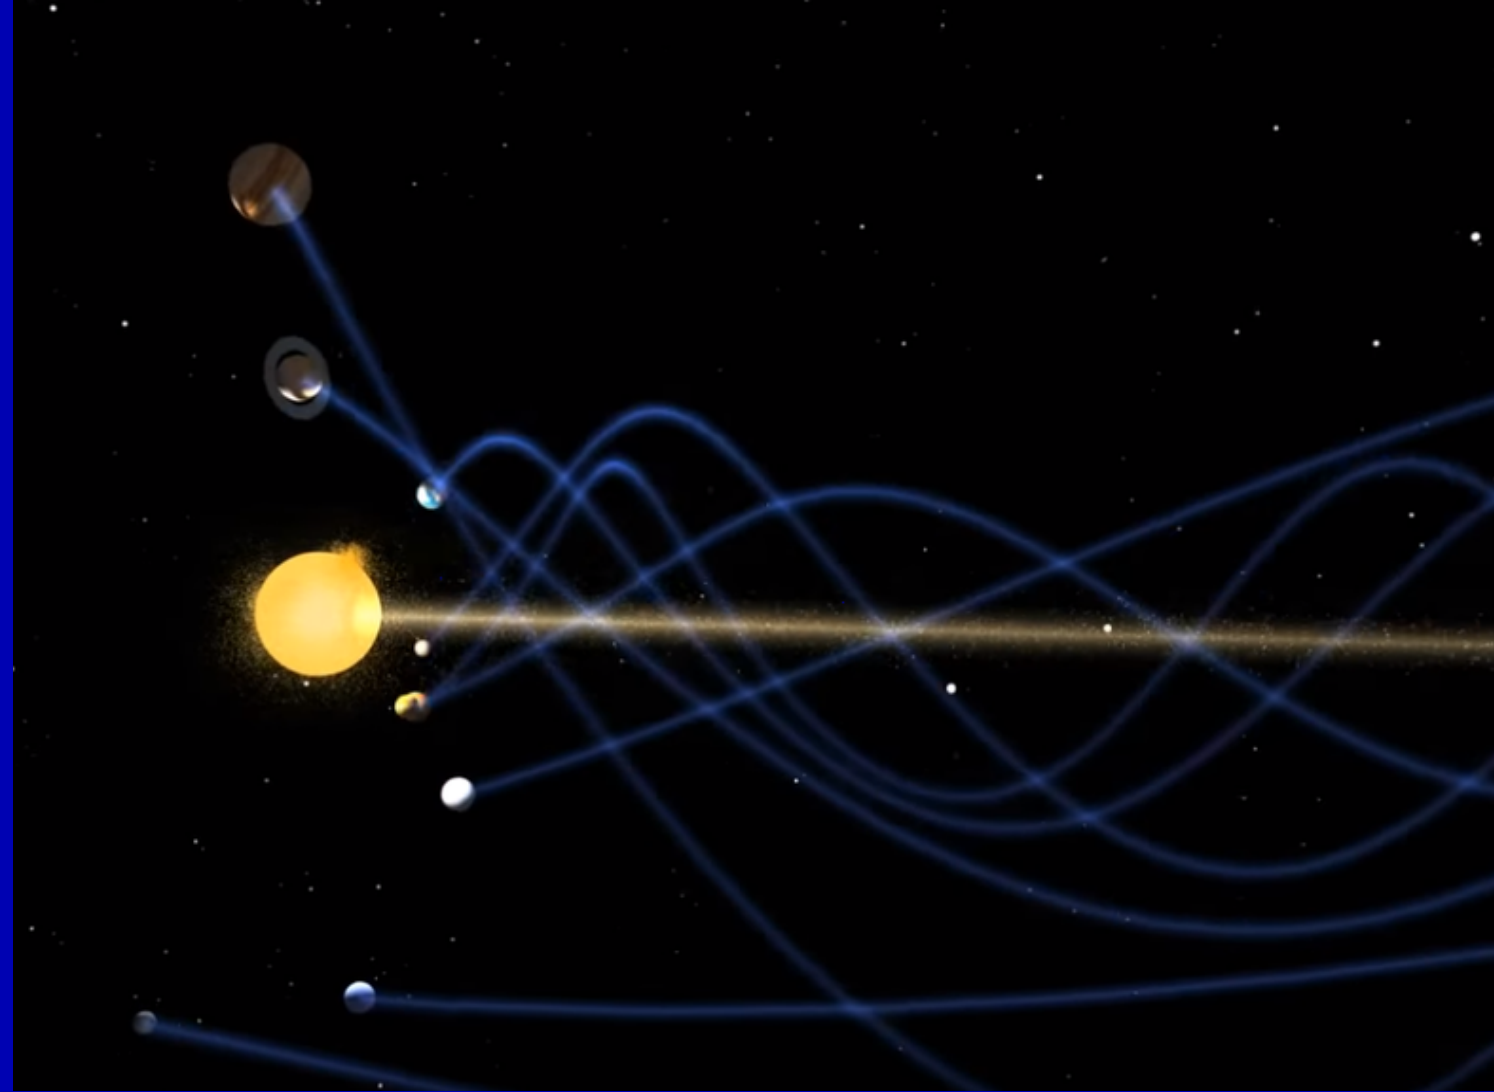

Vega's nearness to and part of the 26,000 year pole position is deepened due to the Solar Apex.

An inquiry into how our senses today perceive these stars and how the ancient cultures viewed them is a question we can all explore.

Traveling at about 140 miles per second or 225 km/sec, our Sun takes about 230 million years to complete one circuit around our galaxy.

The amount of time it takes for our Sun to orbit around the center of the Milky way has been referred to as a Cosmic Year.

The orbit of the Sun is currently away from the Star Sirius (Solar Antapex) and toward the Star Vega (Solar Apex).

Sirius and Vega redrawn from the Dendera Zodiac found on the ceiling in the Dendera Temple in Egypt

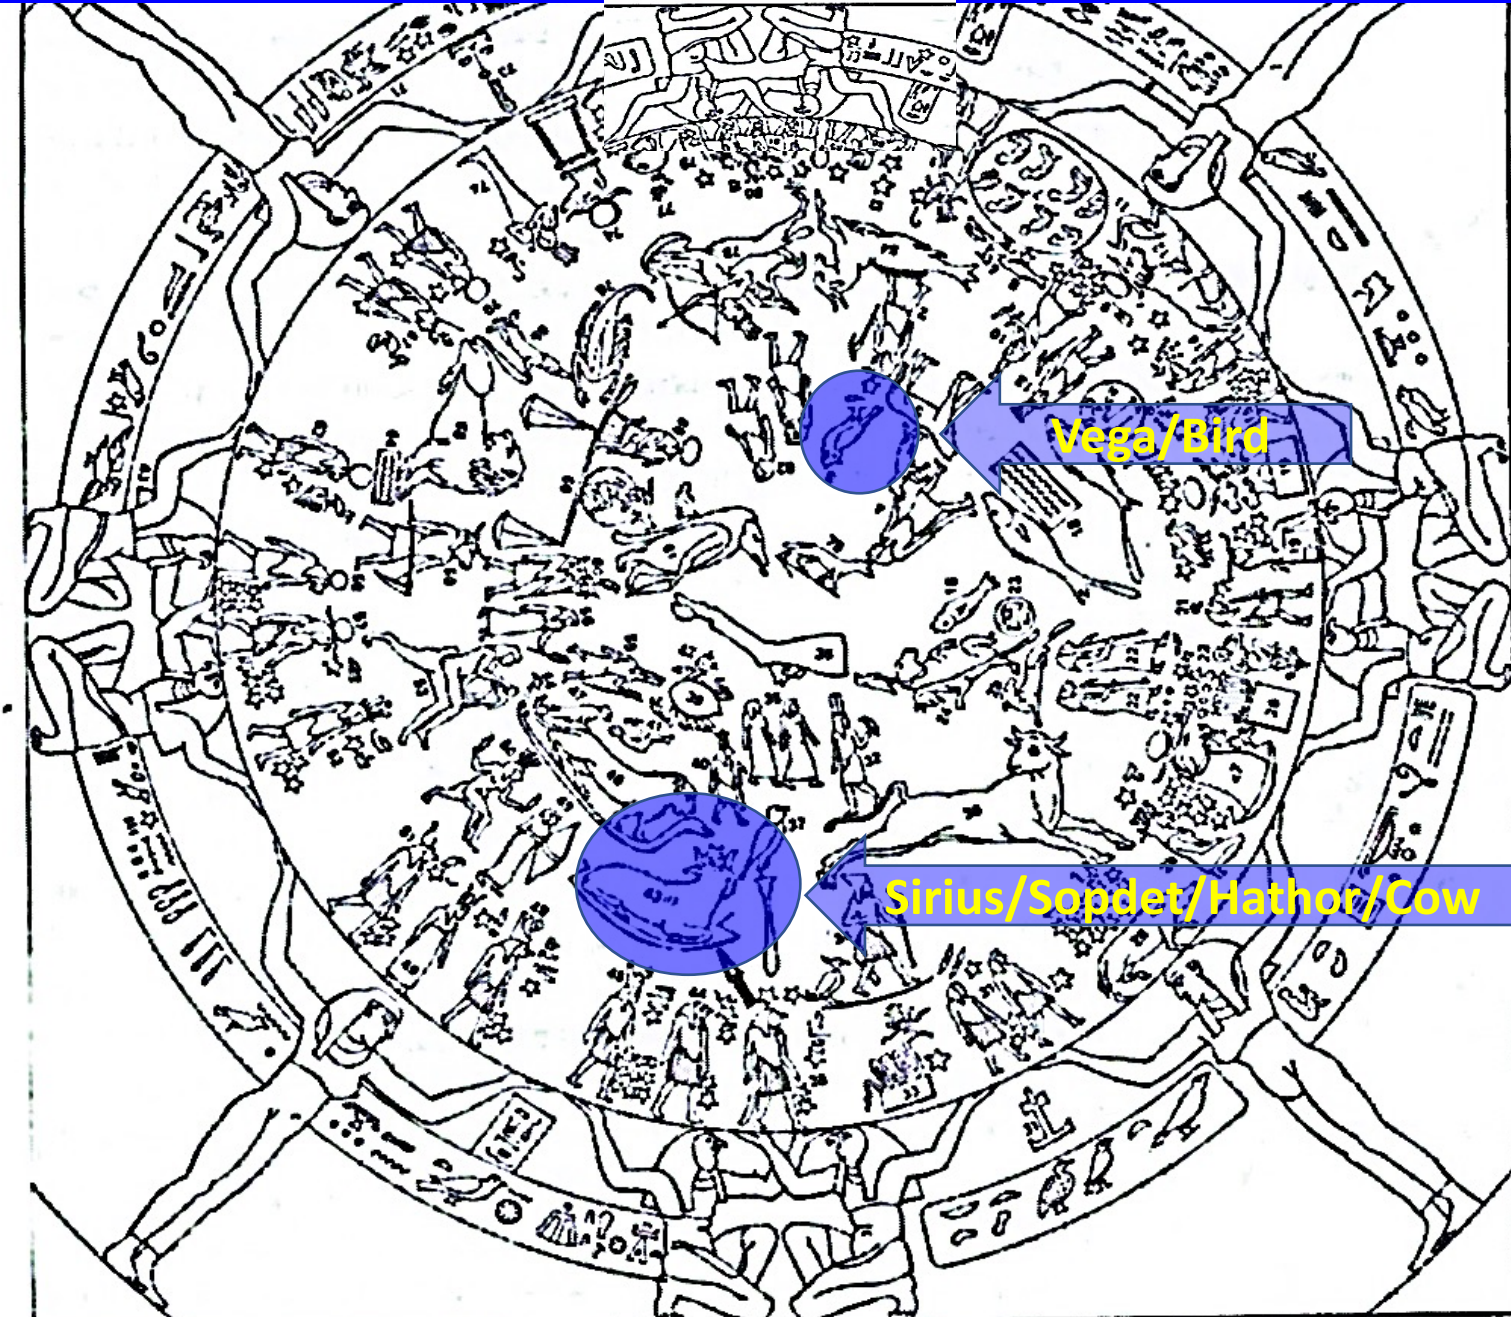

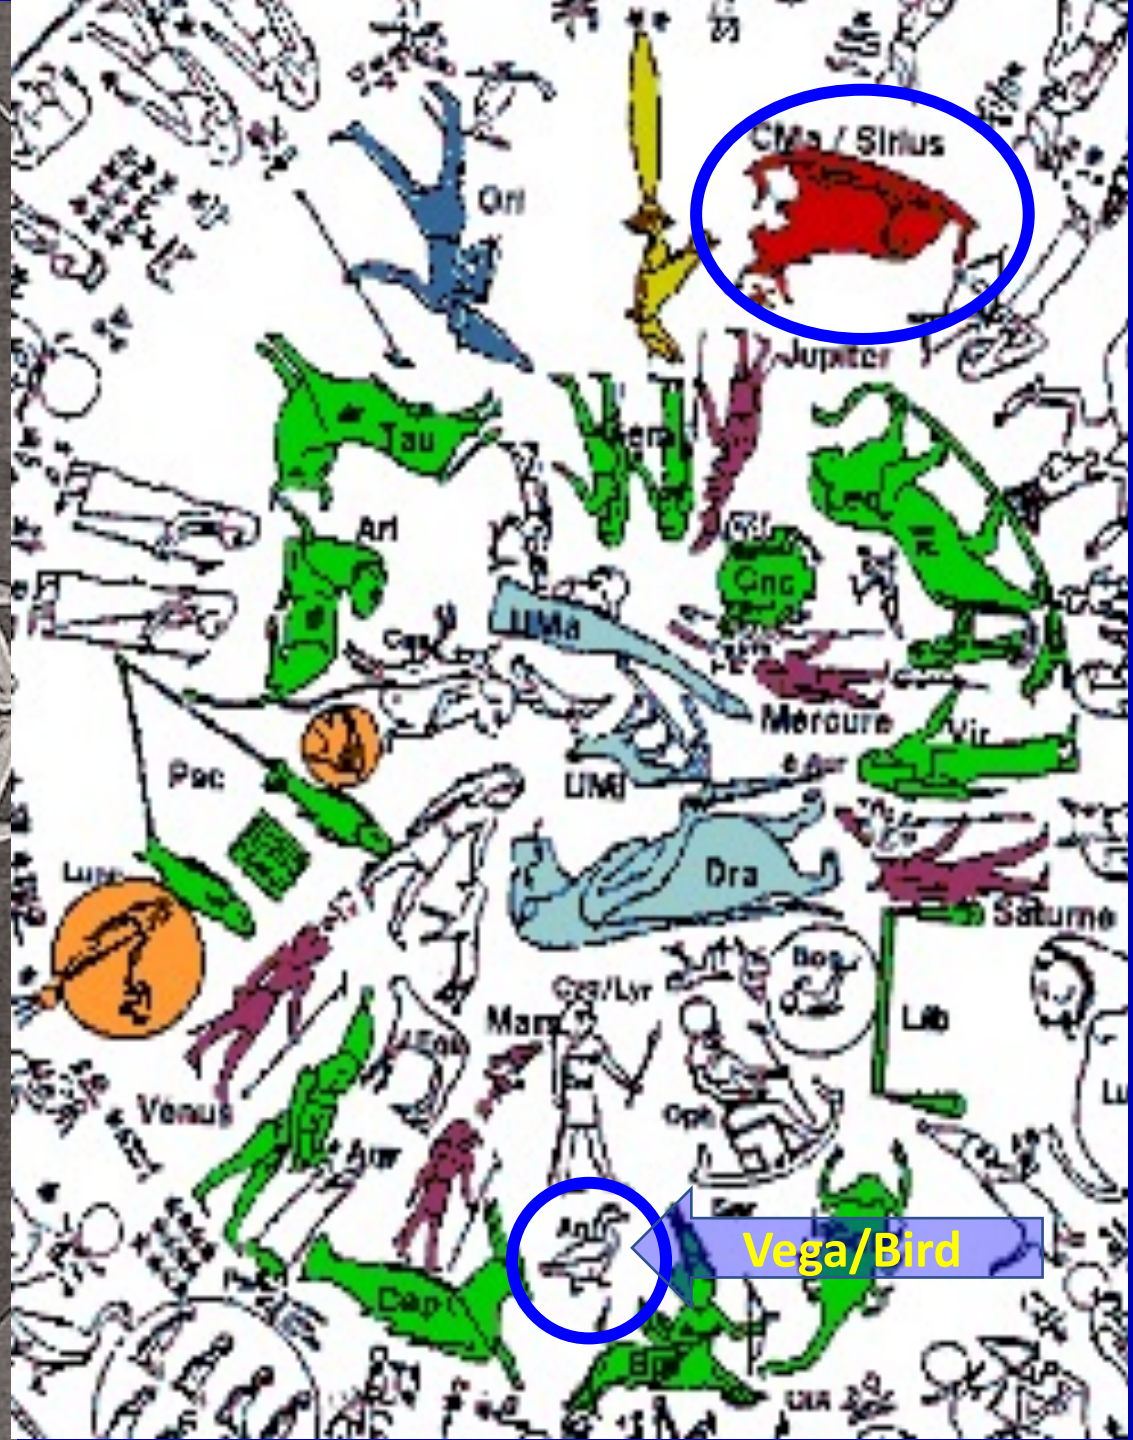

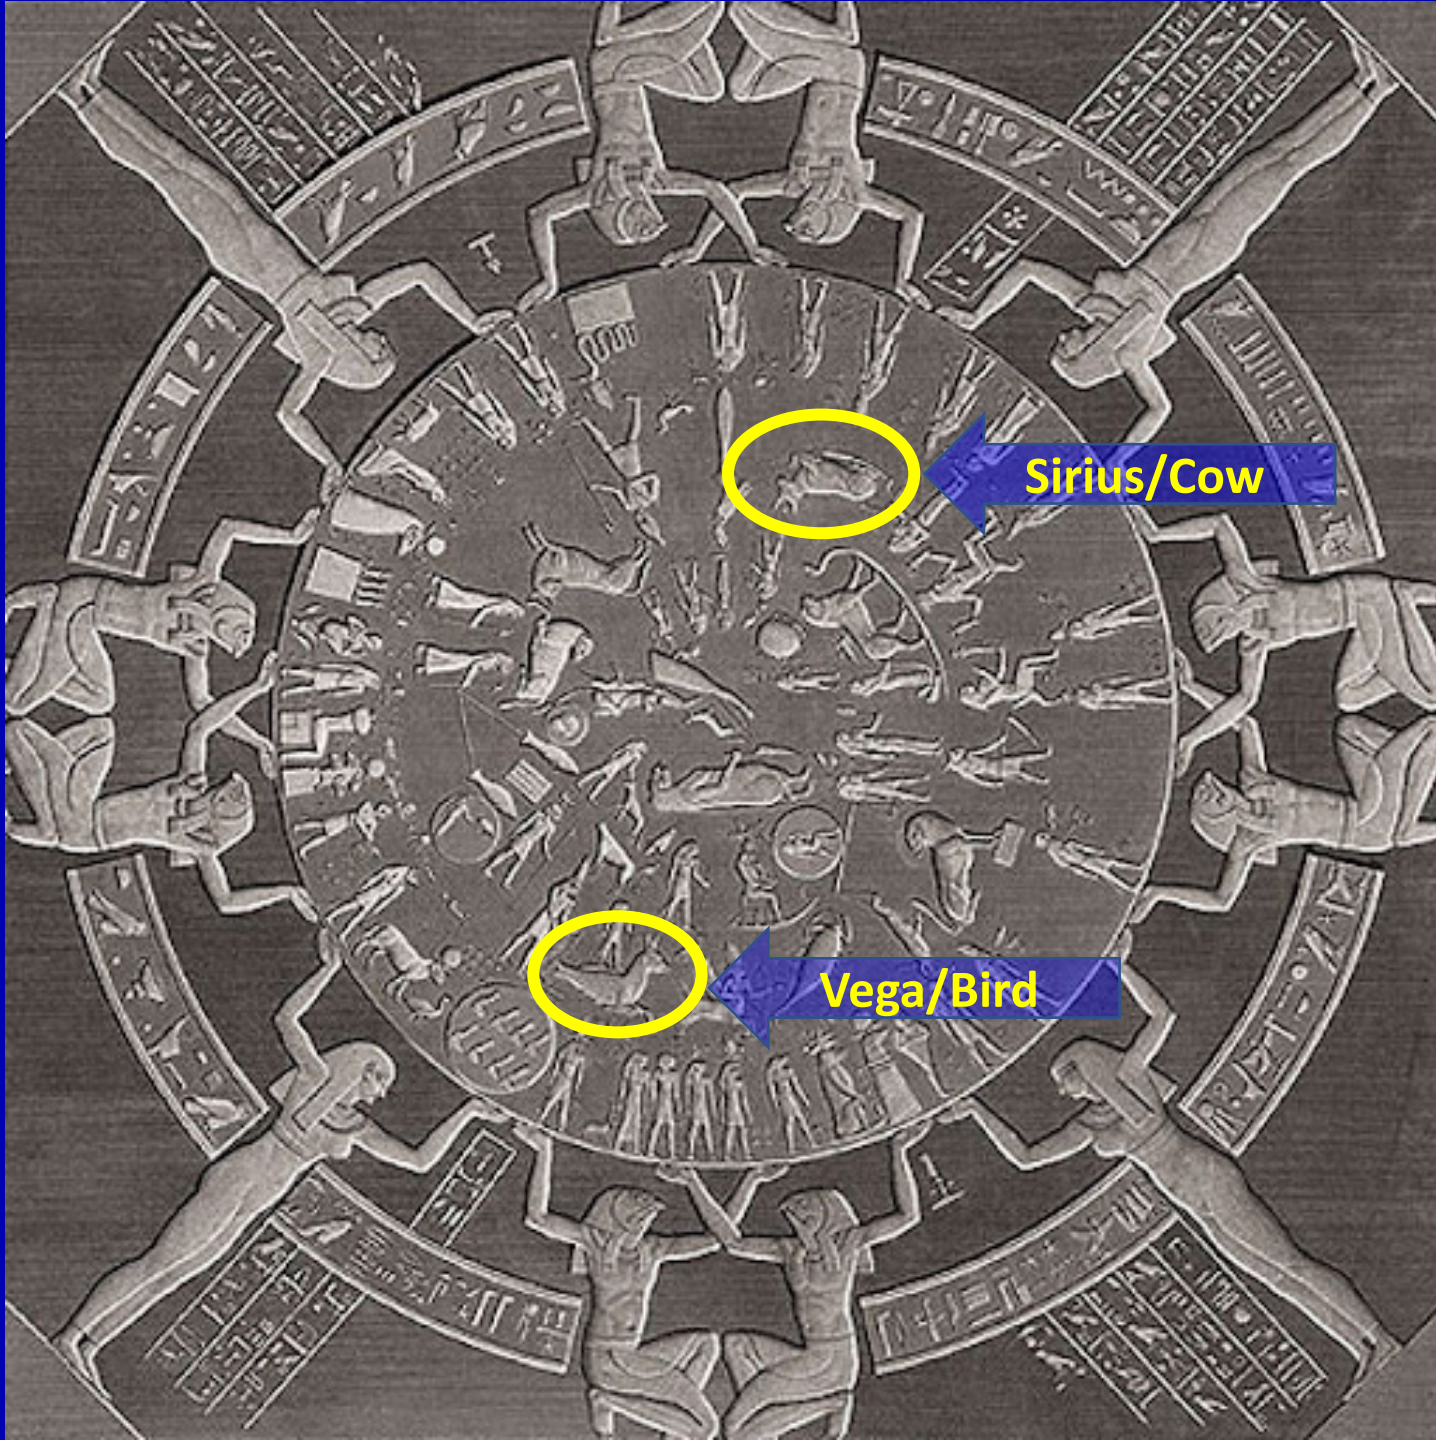

Figure 1.3. The Circular Zodiac at Dendera. Sirius as the kneeling cow-goddess Hathor indicated by the arrow (*An Historical View of Hindu Astronomy*, John Bently, 1825).

Image to the left from *Sirius Brightest Diamond in the Night Sky* by Jay B Holberg

Vega was the Pole Star about 13,000 Years ago.

Due to precession Polaris is the current Pole Star in the Northern Hemisphere.

In about 11,500 years from now Vega will once again be the Pole Star and also the brightest star in the whole circle of successive pole-stars, only  $4\frac{1}{2}^\circ$  from the exact point, as it was about 14,300 years ago.

In 1880 it was  $51^\circ 20'$  distant.

Professor Lewis Boss and Herr Stumpe place Vega near the Apex of the Sun's Way.

<https://www.constellationsofwords.com/vega/>

In Egyptian mythology Vega was called **Ma'at, the goddess of Justice.**

Vega was also known as the Vulture-star located as the Pole star 12,000 to 11,000 B.C.E.

Some of the temples at Denderah in Egypt are thought to point toward Vega probably about 7000 B.C.

That is one of the oldest dates known to have a connection with Egyptian temple worship.

# Vega and Winter Savory

*Satureja montana* (winter savory or mountain savory), is a perennial, semi-evergreen herb from the mint family and native to warm temperate regions of southern Europe, the Mediterranean, and Africa.

It has dark green leaves and summer flowers ranging from pale lavender, or pink to white.

Used as an aphrodisiacs it was associated with Satyrs, and the god Pan, by the Early Greeks and Romans so has qualities that connect with promoting pleasure and ecstasy.

Can be used in the creation of talismans to help relieve negativity and ease all sorts of physical ailments, while at the same time assisting with concentration and memory enhancement.

Also used ceremonially as a cleansing, empowering, or banishing incense.

# Winter Savory

Winter Savory is excellent for treating intestinal disorders including cramps, indigestion, diarrhea, nausea, and intestinal gas.

Can be used to treat cough and sore throat, increase sex drive, and as a tonic. Winter Savory oil is used as a flavoring agent.

It increases the production of urine (as a diuretic) and by opening (dilating) blood vessels.

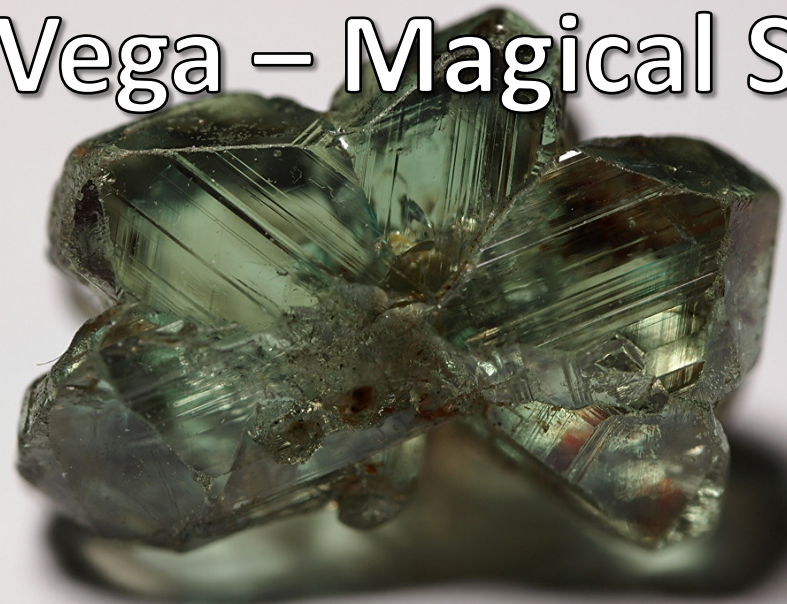

Cooking with Winter Savory leaves adds flavor to long, slow cooked soups and stews. Commonly used as a seasoning for green vegetables and beans.

**Try heating olive oil or butter with winter savory, thyme and rosemary then add onions celery, fennel, and mushrooms.**

## Vega – Magical Stones

Vega sigil on Chrysolite

# Chrysolite Peridot

Supports the heart and circulatory system

3<sup>rd</sup> and 4<sup>th</sup> Chakras

### Qualities of Chrysolite / Peridot

“Peridots are little green nuggets of positive power. Their vibration an inner sense of warmth and well-being.”

Simmons writes that this stone can be used to “bless and energize one’s work.” He continues, “*it is a tool for bringing physical reality into alignment with one’s inner truth.*”

Thank you for Blessing My (Talisman, Amulet, Elixir, Altar)  
Joyously Guide Me  
To Be Where I am Meant to BE!  
Fulfilling My Divine Design  
In Ways that provide the highest most Beneficial Results  
In My Life and And For All Life Everywhere!

# Starlight Elixirs on Polaris in Ursa Minor

A White Super Giant 350 Light Years away

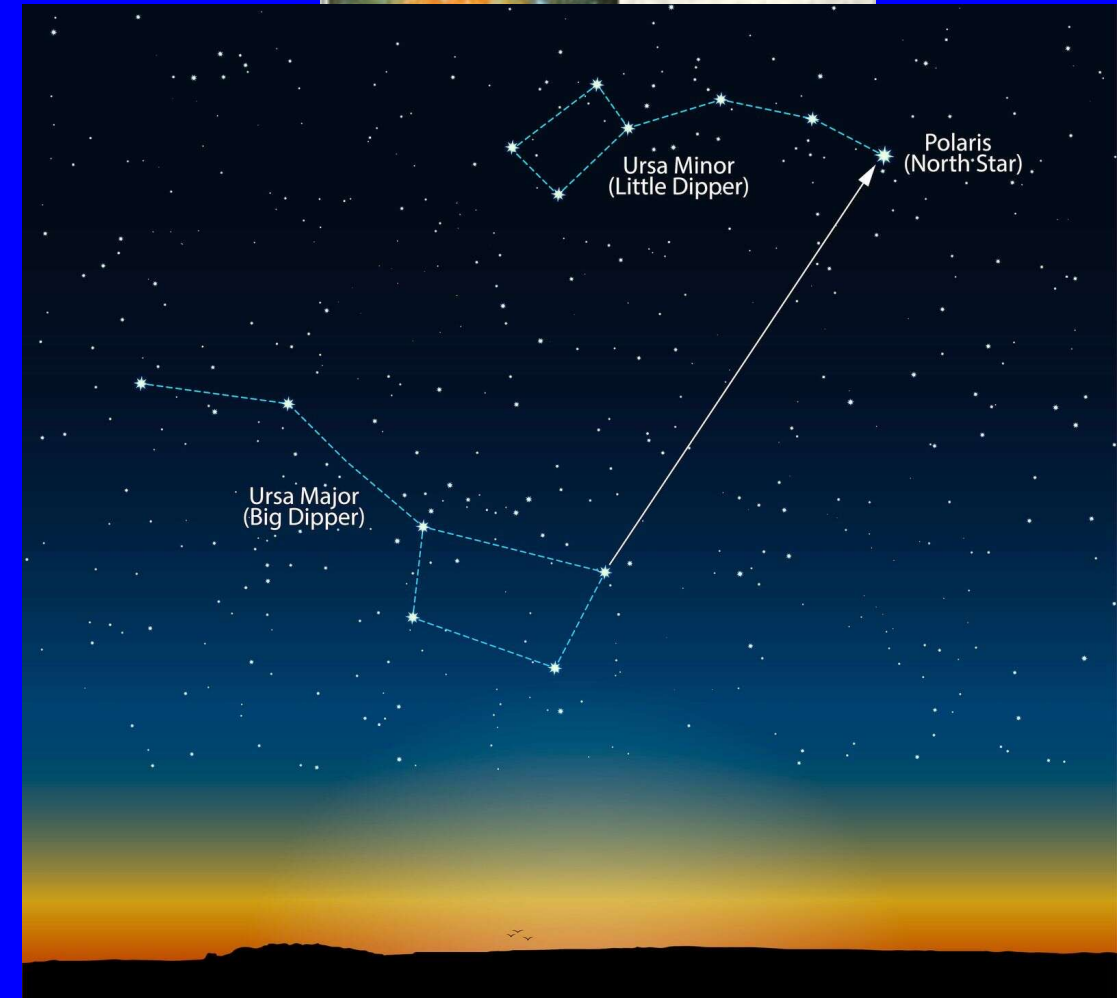

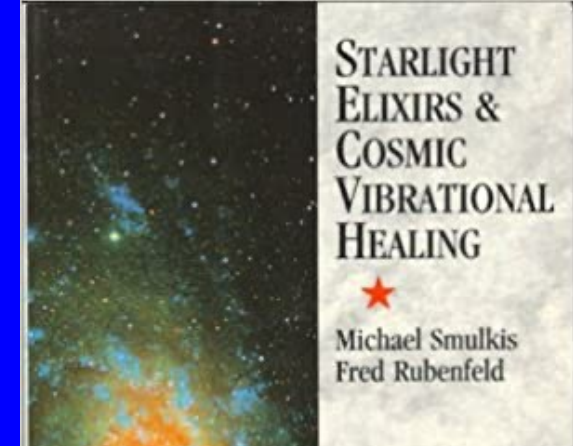

Polaris helps us navigate through life and represents a deep level and often unconscious ability to align with a common source for the purpose of bringing through energy that can be applied in this world.

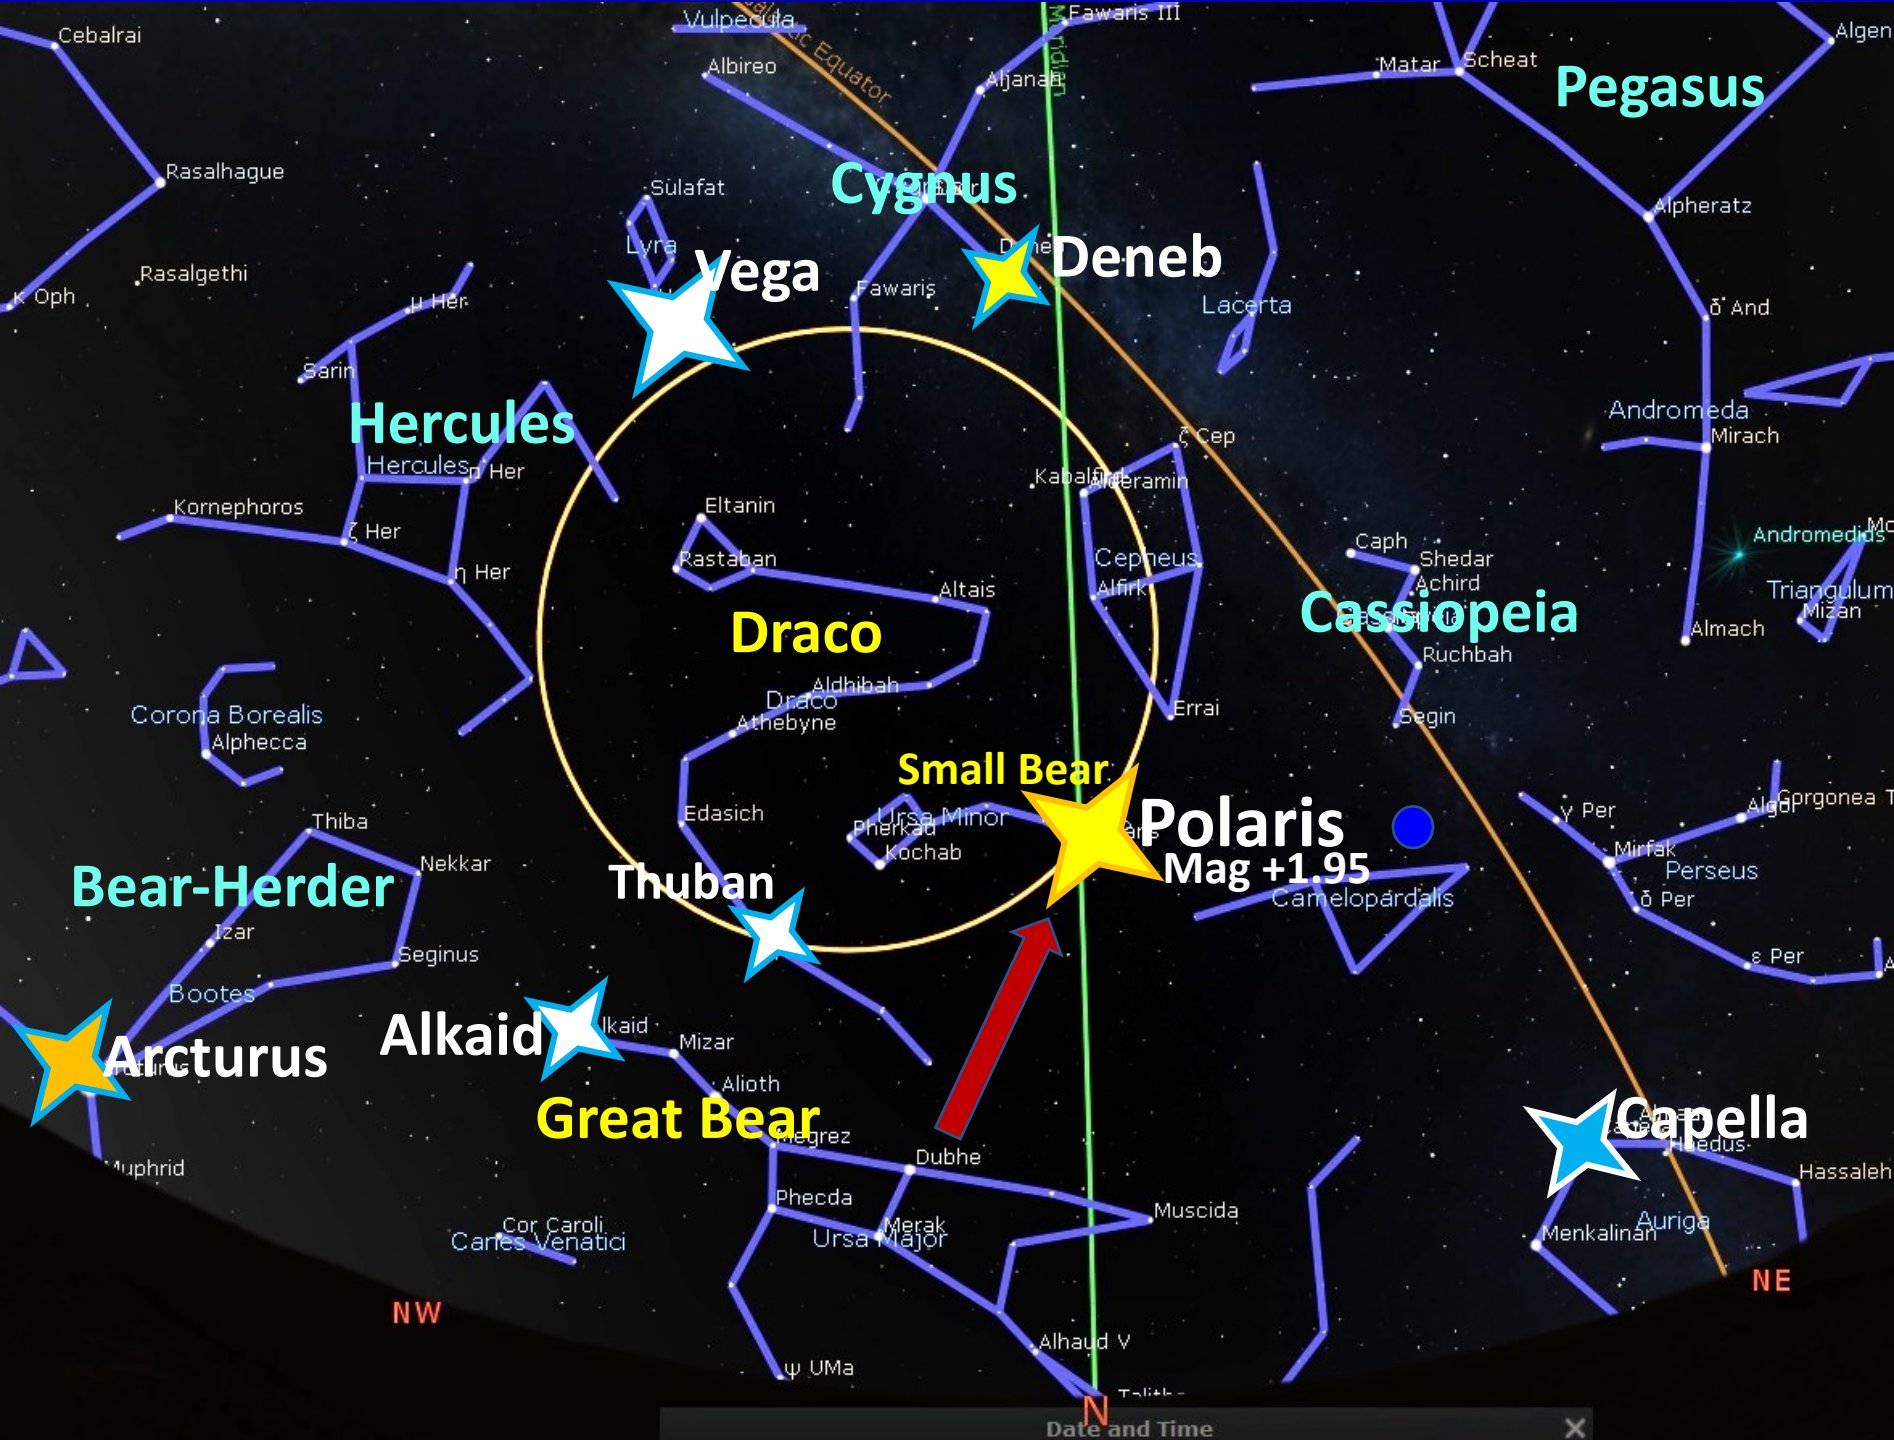

This creates a subtle alignment with the nature of the divine energy that supports and sustains humanity - as one bringing people together and aligning them in ways that are supportive to all involved for the greater good.

Polaris supports the realignment with higher spiritual principles.

It is a great energy to utilize in group situations where there is loving action being engaged for the greater good of ALL life.

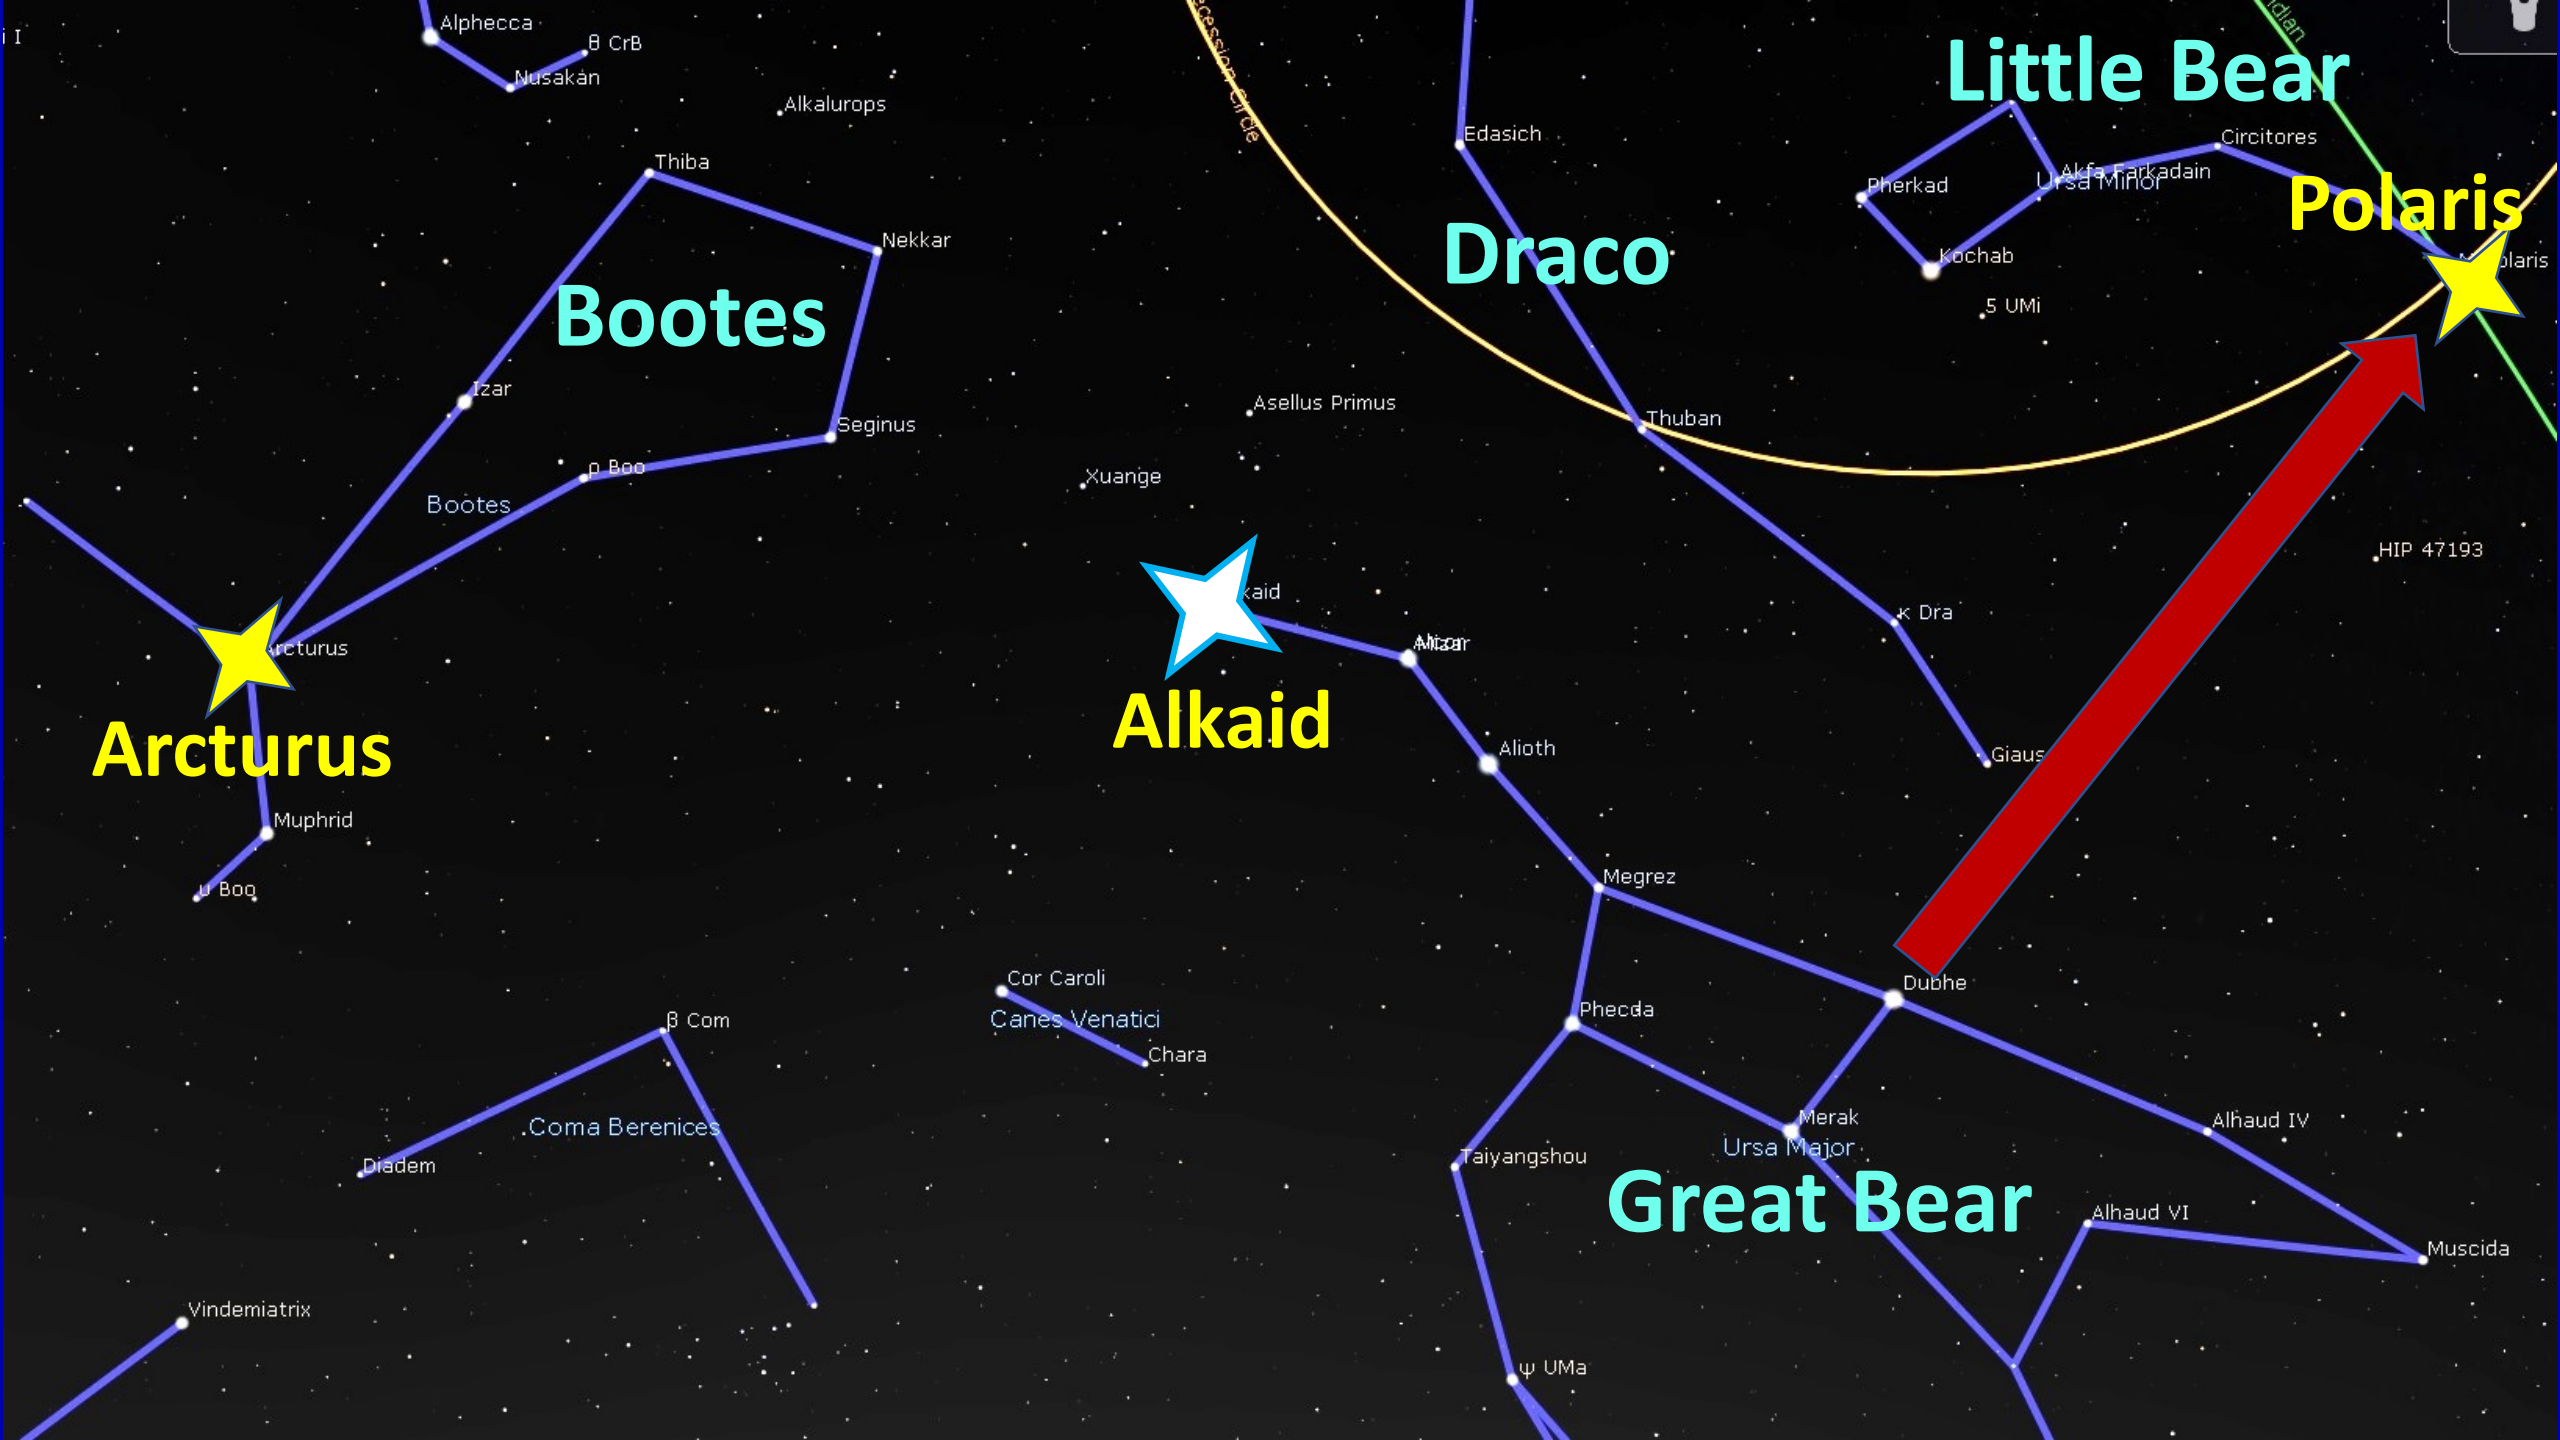

~ Starlight elixirs and Cosmic Vibrational Healing by Michael Smulkis us and Fred Rubinfeld published in 1992

Aratus was a Greek Poet (around 310 to 240 BC) who wrote about the stars in the sky. This is how he described the Two Bears and Draco:

*Between the two Bears, in the likeness of a river, winds a great wonder, the Dragon, writhing around and about at enormous length; on either side of its coil the Bears move, keeping clear of the dark blue ocean.*

# The Big Dipper Pointing to Polaris

Each Season finds the Big Dipper pointing to Polaris from a different angle.

This shows how Polaris is currently at the center point of the Earth's seasonal clock in from the Northern Hemisphere.

Polaris is not visible in the Southern Hemisphere

# Southern Hemisphere view of the Big Dipper and the Behenian Star Alkaid depending on your latitude

# More about Polaris as the Pole Star

Photo credit – Ken Christison / earthsky.org

This is a premier star for navigators, travelers and wanderers across the Northern Hemisphere due to it being nearly exact on the polar position directly above the Earth's North Pole. Polaris is the tail point of the Little Bear Constellation (Ursa Minor)

Bernadette Brady writes that **our planet's North Pole will "be within a diameter of the Moon,"** in the year **2102 CE.**

**All other stars circle Polaris** and will continue to do so for several more centuries (and has been for centuries prior to the current time).

The last star to come close to its position is **Thuban** in the Draco constellation in 3000 BCE.

Another star, **Kochab**, in the same constellation as Polaris was the "pole star" at 1000 BCE, but was not as exact as **Thuban** or **Polaris** in that it was about 7 degrees off the center pole axis.

# Polaris is currently the Pole Star

Eric Morris in his book *The Living Stars* suggests that Polaris as a guiding star is guiding us in our life wanderings. The question is how good are we at receiving and also giving guidance?

From the book *The Star Lore Handbook* by Jeffrey Cornelius we learned that the stars of the Little Bear (Ursa Minor) considered circumpolar stars - were used by Phoenician mariners for navigation with extra preference given to Polaris.

Most of the myths about these stars connect the stars of the Little Bear with the Big Bear. However, the German cosmographer Petrus Apairus (1495 to 1522) attributed the story of the Hesperides, the seven nymph daughters of the Titan Atlas to this constellation next to the great dragon or serpent Ladon (a.k.a Draco) who protected the tree.

The seven sisters attended the tree of golden apples later given to Hera (Venus) by the Earth Goddess Gaia as a wedding gift on her marriage to Zeus (Jupiter).

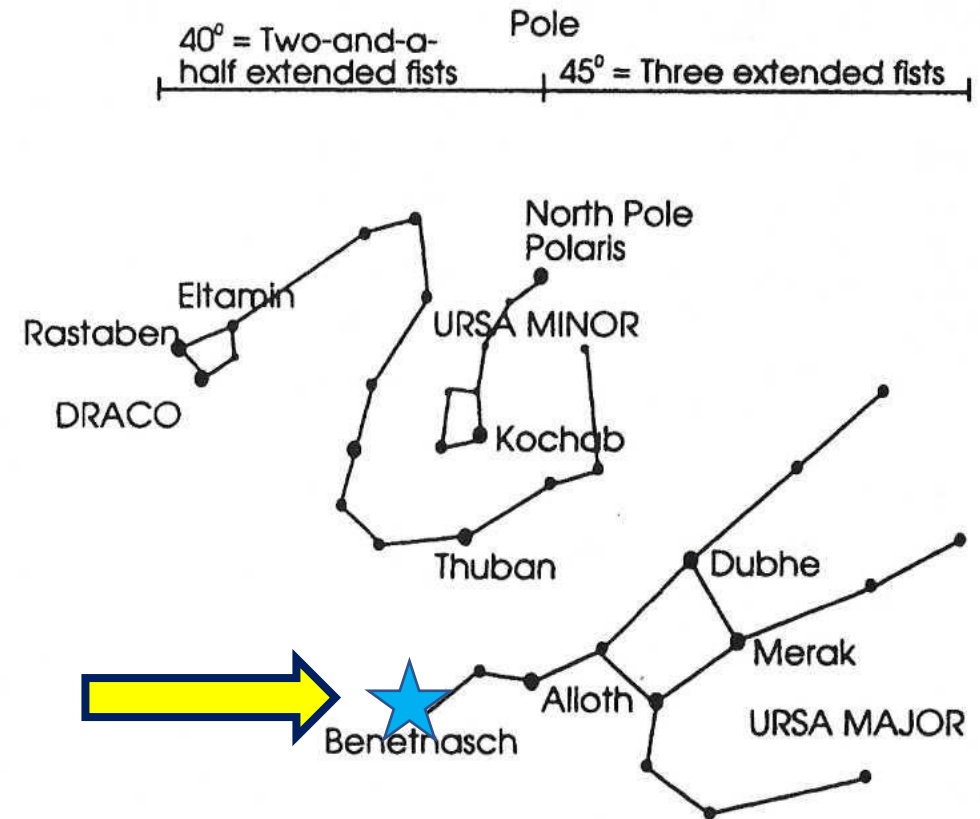

'Garden of the Hesperides', Sir Edward Burne-Jones

# The Goddess and the Dragon

Bernadette Brady says the Great Bear constellation was called the **“She-Bear Goddess.”** This was the first written reference in history in the Babylonian creation myth.

**Benetnasch** is the “Governor” of the daughters of the Bier or Bear. Depending upon how one sees the constellation, this star (Polaris) reaches a “high” point toward the 26,000 year precessional circle of the Earth through space.

Later in Christianity, Ursa Major had become the “mythical Saint Ursula.” And there was a Catholic order of nuns known as the **“Ursulines”** formed in 1506.

*Star Map 9. The Goddess and the Dragon.*

Map and details from “Brady’s Book of Fixed Stars”  
(pgs 134, 202-203)

# The Great Bear and King Arthur

In William Tyler Olcott's book, "*Star Lore for All Ages*", references the circling Ursa Major as relating to King Arthur's Round Table.

Since Ursa Major or the **Great Bear** circles the pole position of the Earth (now occupied by the star Polaris), this constellation has also been seen as a cart or wain. **Arthur's name is derived from the Welsh "Arth", meaning "a bear"**.

Olcott references that British Admiral William Henry Smyth, "*finds in the circling of this constellation about the Pole the possible origin of King Arthur's famous Round Table.*"<sup>1</sup>

Hinckley shares that "Great Britain long called it **Arthur's Chariot or Wain**, which appears in the *Lay of the Last Minstrel*

<sup>1</sup> cited author Richard Hinckley Allen pgs 425-26 from *Star Names their Lore and Meaning*

Arthur's slow wain his course doth roll  
In utter darkness round the pole;  
The Northern Bear lowers black and grim;  
Orion's studded belt is dim;

Twinkling faint, and distant far,  
Shimmers through mist each planet star;  
Ill may I read their high decree!  
But no kind influence deign they shower  
On Teviot's tide, and Branksome's tower,  
Till pride be quell'd, and love be free.'

# Polaris / Alkaid the Magical Stone

## Lodestone / Magnetite

A naturally magnetized piece of mineral magnetite

In ancient times, Polaris was known as the “lode-star” by seafarers.

This stone supports the blood, liver, bone marrow and aligns the meridians.

Simmons notes it as one of the “essential stones for crystal healers because of its many uses in aligning the currents of the auric field.”

It is a stone that balances polarities, awakens hidden potentials and is good at emotional balance.

# Polaris Herbs Same as Alkaid Succory, Periwinkle, Mugwort

## Periwinkle Medicinal Uses:

Diuretic

Calms nerves

Relieves Headaches

Treats Asthma & Cancer

Treats Kidney Stones & Ulcers

Relieves Menstrual Pain

Focuses Attention

Strengthens Memory preventing decline

Kills Germs and heals wounds

Regulates Blood Pressure and treats anemia

Magical Uses: Enhances all magical intentions,  
Provides Protection and a Peaceful Home, Attracts  
Abundance and the Ideal Partner...

## Health Benefits of Mugwort

Organic Facts  
www.organicfacts.net

Promotes discharge of bile and gastric juices into stomach

Beneficial in treating menstrual problems

Helps to fight infections

Helps to increase frequency and quantity of urination

Aids in curing digestive disorders

Helps to maintain proper health of uterus

Effective in treating nervous afflictions and disorders

Useful in treating amenorrhea and dysmenorrhoea

Effective in elimination of roundworms and tapeworms

Provides relief from epileptic and hysteric attacks

Stimulates secretion of hormones and enzymes from endocrinal glands

Caution: Avoid usage during pregnancy. Has toxic and narcotic effects on brain and nervous system

Uplifting and transforming all Lower Vibrational Energy  
Into the Super Coherent, Superconductive Energy of Love

## Starlight Elixirs on Alkaid in the Constellation of Ursa Major Blue/White Star 150 Light Years away

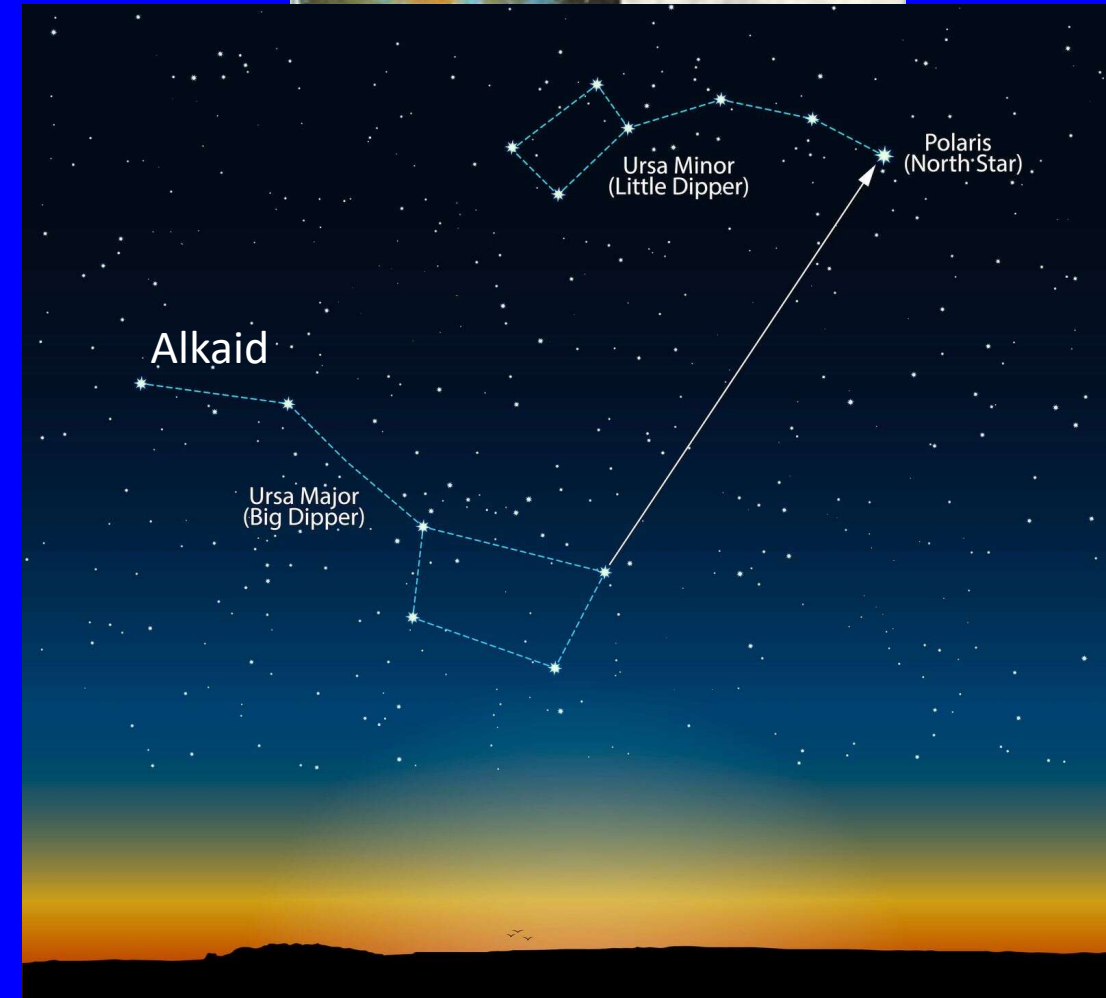

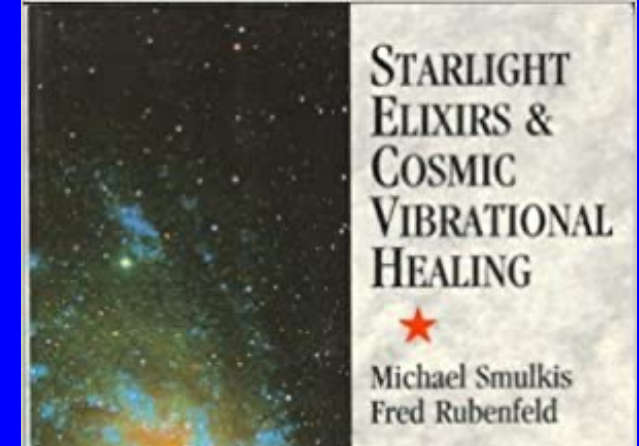

Alkaid assists in the integration of spiritual ideas with internal concepts of power, expression, and emotion. It brings into consciousness long buried emotions, a sense of power, and a deep expressive ability promoting a deep state of integration.

This produces a deeper sensation of healing warmth throughout the physical body and the Earth.

Earth is a power planet going through processes of destruction and recreation. The power of change reveals deeper internal truths related to the awareness of what it means to be alive.

Connecting with this star helps you be more aware of this evolutionary process within you as the Earth increases her vibration, we have the same opportunity.

~ Starlight elixirs and Cosmic Vibrational Healing by Michael Smulkis us and Fred Rubinfeld published in 1992

# Astronomy of Alkaid

- A blue star around 103.9 light-years from Earth
- It is the easternmost star of the famous Big Dipper / Plough asterism and unlike most stars of this asterism, it isn't part of the Ursa Major moving group of stars.
- It has a rotational velocity of around 150 km or 93.2 mi per second.
- It has an apparent magnitude of +1.86 and an absolute magnitude of -0.67
- It is a very young star, being only around 10 million years. Much younger than our Sun.
- And it has 610% of the Sun's mass – so way bigger, hotter and brighter

Alkaid

Alkaid was near the pole star about 6500 years ago, prior to Thuban and equal-distant from another star in Draco, Ed Asich or Edasich

Alkaid is brighter...

# Alkaid

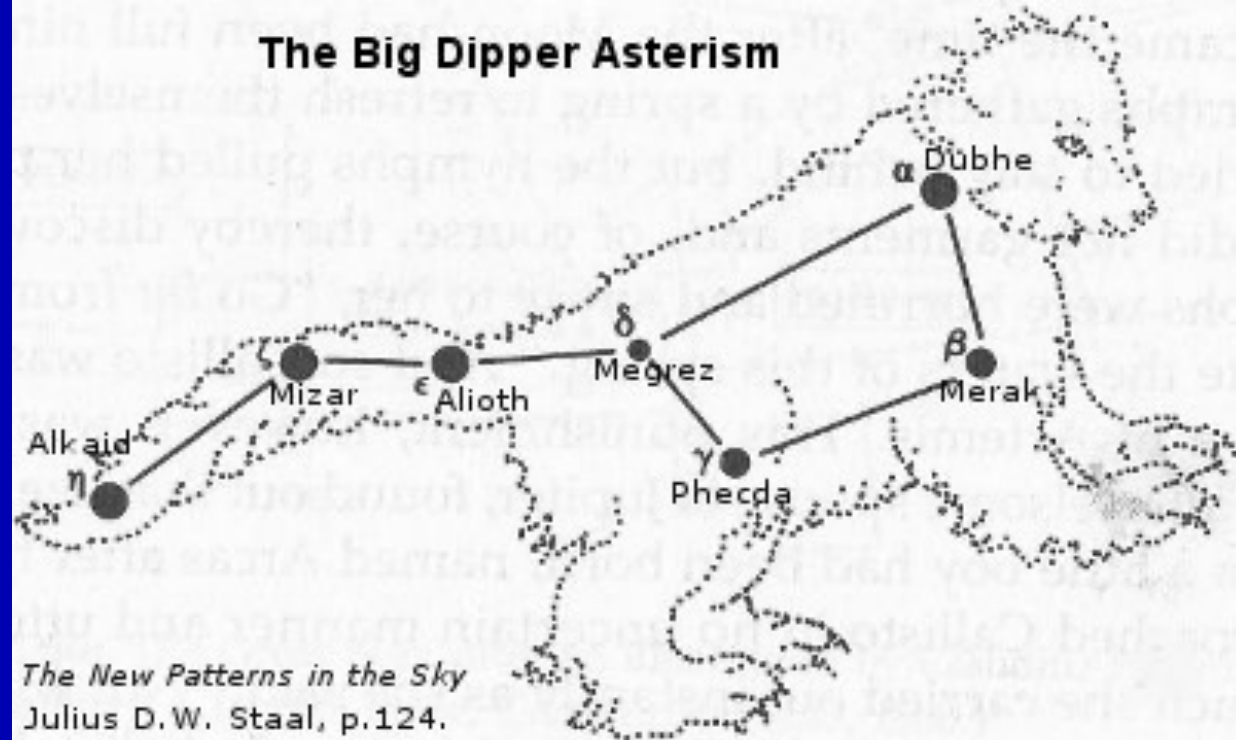

Alkaid is also known as **Benatnasch**, meaning the **“Governor of the Daughters of the Bier”**. The stars of the tail make up the mourners carrying the casket/coffin.

The bear would/could be seen leading the train of her mourners as a “wain” and the tail her cubs.

The Iroquois refer to the 3 stars that make up the tail of the bear as *the hunters in eternal pursuit of the Great Bear*.

Alkaid at the tip of the tail of the Great Bear is *sometimes confused with Polaris*, marking the tail of the Little Bear, *Ursa Minor*. Many Native American stories come from the constellation of the Great Bear, *Ursa Major*.

The Big Dipper Asterism

- The Chinese knew Alkaid as the Seventh Star of the Northern Dipper – an asterism that corresponds to the western Big Dipper.
- It was also known as the Star of Twinkling Brilliance.
- The Chinese associated Alkaid with the direction of north.
- Chinese Hunters and soldiers traditionally avoided pointing their guns in Alkaid's direction as it was considered unlucky

[Astronomytrek](#)

- In Korea and Japan, Alkaid is known as “the military breaking star” or “most corner star” respectively; both meanings have their roots in ancient China’s influence in both cultures.
- In Hindu mythology, Alkaid was associated with "Marichi", one of the Seven Sages, one of the sons of Brahma and the grandfather of the deities Asuras and Devas.
- In ancient Indian astronomy, the asterism of the Big Dipper (part of the constellation of Ursa Major) is Saptarishi (the Seven Sages) representing the seven main stars of the Big Dipper.

Rishi Kratu

*Note : These are the Saptarishis according to **Mahabharata**. They may vary on the basis of scriptures (Shatapatha Brahmana and Brihadaranyaka Upanishad) and Manvantaras.*

# Alkaid – Magical and Alchemical Details

## Plants and animals associated with Alkaid:

- Succory
- Chicory (Agrippa shares about Mugwort)
- Flowers of Periwinkle
- Tooth of a Wolf

**Agrippa shares about the Alkaid talisman:** *“They made the image of a pensive man, or of a bull, or the figure of a calf; it availith against incantations, and maketh him who carrieth it secure in his travels.”*

**Warnock prescribes the properties of this star** (in the form of a talisman), *“for protection from physical and spiritual attacks and also for spiritual guidance because it is a circumpolar star.”*

# Succory / Chicory - associated with Alkaid

The Wild Succory (*Cichorium intybus*) is a common roadside English plant, white or blue, belonging to the Composite order, and called also Turnsole, because it always turns its flowers towards the sun.

It blows with a blue blossom somewhat paler than the Cornflower, but "bearing a golden heart."

Its fresh root is bitter, and a milky juice flows from the rind, which is somewhat aperient and slightly sedative, so that this specially suits persons troubled with bilious torpor, and jaundice combined with melancholy. An infusion of the herb is useful for skin eruptions connected with gout.

If the root and leaves are taken freely, they will produce a gentle diarrhea, their virtue lying chiefly in the milky juice; and on good authority the plant has been pronounced useful against pulmonary consumption. In Germany it is called *Wegwort*, or "waiting on the way." The Syrup of Succory is an excellent laxative for children. The Succory or *Cichorium* was known to the Romans, and was eaten by them as a vegetable, or in salads.

**When cultivated it becomes large, and constitutes Chicory**, of which the taproot is used extensively in France for blending with coffee, being closely allied to the Endive and the Dandelion.
